World Development Report 2018 - World Bank Group 2017-10-16

Every year, the World Bank's World Development Report (WDR) features a topic of

central importance to global development. The 2018 WDR—LEARNING to Realize Education’s Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education’s promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally

comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to

reform.

2011-07-30
Intended as a text for the undergraduate and

postgraduate students of Political Science, this compact book brings to fore the political thought of various Indian thinkers over the decades. The book begins with a detailed discussion on the political thought of Manu, the lawgiver, whose classification of the different castes and their duties is highlighted. Then it goes on to give a comprehensive account of such thinkers as Kautilya, the author of Arthashastra, who talks about the four stages of life and the duties of the King; Raja Ram Mohan Roy, the religious reformer; Swami Dayananda Saraswati, the Hindu reformer and advocate of the Vedas, who criticized untouchability and discrimination of women and who set up the Arya Samaj. Besides, the book deals in detail with such thinkers as Swami Vivekananda, Bal Gangadhar Tilak, Gopal Krishna Gokhale, and Shri Aurobindo. Further, the book analyzes the political thought of the great Indian leaders such as Mahatma Gandhi, the Father of the Nation, whose ideas of Satyagraha, Ahimsa (Non-Violence), Swadeshi,

and Swaraj are too well known and who galvanized a whole nation in achieving Independence; Jawaharlal Nehru, the Architect of Modern India and the first Indian Prime Minister whose ideas on socialism, democracy, planning and foreign policy have guided the nation; the indefatigable JP (Jaya Prakash Narayan), the pioneer of socialist movement; and Bhimrao Ambedkar, the Architect of the Indian Constitution — the great social reformer who championed the cause of the scheduled castes, the underprivileged and the marginalized sections of the society. Finally, the book makes an analysis of ideas of other thinkers, namely, Sir Sayyed Ahmed Khan, a great advocate of communal harmony, Muhammad Ali Jinnah, an advocate of theocracy; Lala Lajpat Rai, the Lion of Punjab and the propounder of Swaraj; Ram Manohar Lohia, a powerful exponent of socialism; Vinayak Damodar Savarkar, an opponent of absolute non-violence, and Mahatma Jyotirao Govindrao Phule, a great

social reformer. This text, which compresses the political thought of the great Indian thinkers and leaders, will benefit not only undergraduate and postgraduate students but also aspirants of civil services and any one who wishes to delve deeper into the subject.

English Transcription Course - Maria

Lecumberri 2014-03-18

Have you ever been confused by the fact that the words 'though' and 'bough' are pronounced differently, or frustrated by the realisation that 'hint' and 'pint' don't rhyme? It is well known that the spelling system of English is notoriously unhelpful as an indicator of how to pronounce English words. Spoken and written representations of English are mutually inconsistent, making it difficult to interpret the 'logic' of the language. Learning to transcribe English phonetically, however, provides an accurate visual interpretation of pronunciation: it helps you to realise what you actually say, rather than what you think you say. English Transcription Course is the ideal workbook for anyone wishing to practice their transcription skills. It provides a series of eight lessons, each

dealing with a particular aspect of pronunciation, and introduces and explains the most important features of connected speech in modern British English - such as assimilation, elision and weak forms, concentrating on achieving a relaxed, informal style of speech. Each lesson is followed by a set of exercises which allow for extensive practise of the skills learnt in both current and previous chapters. Students can check their progress with the 'model' answers provided in the appendix.

his theories to himself. His exciting and inspiring book is certain to change lives of many others.

How I Made Two Million Dollars in the Stock Market - Nicolas Darvas 1986

How I Made 2,00,000 In The Stock Market
Nicholas Darvas, author of How I Made 2,000,000 in the Stock Market, concluded that Wall Street was nothing more than a huge gambling casino. It bristled with dealers, croupiers and touts--and he explained all of this in a later highly successful book, Wall Street: The Other Las Vegas. How I Made 2,000,000 in the Stock Market is an extraordinary book. It tells one of the most unusual success stories in the history of the stock market. Darvas was not a stock market professional trading on inside information. He was one half of the highest paid dance team in show business. Yet he was able to make himself a millionaire several times over by his unique investment approach. Unlike other so-called systems, it worked regardless of whether the market rose or fell. When news of Darvas'

fantastic profits and methods leaked out, he was featured in Time Magazine. He then was persuaded to write a book which became an instant hit, selling nearly 200,00 copies in eight weeks. Many of the companies talked about in this book no longer exist. Many of the stocks are no longer traded. Nevertheless, the basic principles are as sound as ever.

Motivated Money - Peter Thornhill 2003

As a public speaker, this book was written in response to an ever growing chorus of requests for my 'notes'. I have never had notes as the presentations I make are based on 40 years experience in the financial services industry both here and abroad. After so many years, I had begun to question more and more of the assumed wisdom of much of the financial services industry. I left the industry in 2000 to free myself from the shackles of being paid to present a message I no longer believed in and to write this book. I now believe that behavioural finance is more important than economics and as

a result, share markets are guided by forces beyond reason. Their short term ups and downs can be linked to collective human behavior, not a logical continuum of cause and effect. In this book, you will learn that history repeats itself; you'll find out why there's no such thing as a market "crash"; why investing for the long term is the surest way to tap the market's riches; why market volatility is not a measure of risk; and why looking backwards "can damage your wealth."

It eliminates confusing fluctuations and indicates the trend and the buy and sell points-the factors that matter if you want to make money. DAR-CARD is a compact, visual representation of Nicolas Darvas's system; a simple device to be carried in the pocket, to be checked against each day's closing prices. No bigger than a postcard, DAR-CARD contains its own built-in instructions and all the information necessary to make a decision on whether to buy, sell or hold. In addition to providing this unique tool for dealing with the stock market, Darvas offers straightforward advice on: when to buy; what shall I watch for; five ways to create favorable odds; how to detect a must sale; how long to hold a stock; pitfalls of switching; what to look for before taking action.
