**Government and the Economy** - Jan-Erik Lane 2002-01-01

Globalization is a common theme in the discourse of post-industrial society, yet it is a process that is ill understood. Is it basically a technological phenomenon or does its

immense impulse derive from economic factors? Should it be regulated by government, and at what level? Questions such as these are debated continuously in the mass media, yet there are no simple answers available, as globalization is not only an amorphous but also a contested

phenomenon. Government and the Economy is a completely reworked edition of Jan-Erik Lane and Svante Ersson's popular text *Comparative Political Economy*, which the authors have updated for the twenty-first century. They present a profound analysis of how globalization changes the boundaries between state and market, public and private, and government and society. When the state retreats and markets expand, what are the major outcomes? And what is driving this process of redefining the roles of government and the tasks of society? The book offers a penetrating survey of the differences between the countries of the world in terms of their economy and polity,

and a forceful critique of the prevailing models in political economy. Lane and Ersson look closely at Public Choice theories which emphasize the role of markets in accomplishing efficient solutions to human interaction while modeling governments as enhancing state failure. They argue that such accounts are misguided. The need for government in the global market economy is as strong as it is in relation to the domestic economy. They go on to suggest that the most efficient and equitable means of strengthening government in the global market place, without creating one-world government, is the reform and empowerment of IGOs.

### **Origin and Performance of Democracy Profiles** - Oliver Schlenkrich 2021-08-03

This study has two central research questions: Do democracy profiles affect policy performance? And what causes democracy profiles? Oliver Schlenkrich conceptualizes and measures different democracy profiles

(e.g., libertarian-majoritarian or egalitarian-majoritarian democracies) based on trade-offs between the central democracy dimensions of political freedom, political equality, and political and legal control. In addition, the study conceptually and empirically develops a typology of political performance. Regarding the first research question, the empirical analyses of about 80 democracies from 1974 to 2017 indicate that there is not an overall better performing democracy profile. Thereby, the democracy profiles do not have an immediate effect, instead their effects require a longer period of time to manifest. With respect to the second research question, the empirical findings show that several structural and cultural factors are relevant (e.g., British heritage or a competitive culture). This work is mainly based on Bayesian statistics to cope with the complexity of the data and models. About the author Oliver Schlenkrich works currently on the DFG research project

'Causes of Transformation and Democracy Profiles: Empirical Findings of the Democracy Matrix' located at the Institute of Political Science and Sociology, University of Wuerzburg, Germany. His research interests concern democracy, political culture, political participation, quality of statehood, and quantitative methods.

*Strategies for Comparative Research in Political Science* -

B. Guy Peters 2013-10-01

**Pluralism, Democracy and Political Knowledge** -

Professor Hans Blokland  
2013-04-28

The political discontent or malaise that typifies most modern democracies is mainly caused by the widely shared feeling that the political

freedom of citizens to influence the development of their society and, related to this, their personal life, has become rather limited. We can only address this discontent when we rehabilitate politics, the deliberate, joint effort to give direction to society and to make the best of ourselves. In *Pluralism, Democracy and Political Knowledge*, Hans Blokland examines this challenge via a critical appraisal of the pluralist conception of politics and democracy. This conception was formulated by, above all, Robert A. Dahl, one of the most important political scholars and democratic theorists of the last half century. Taking his work as the point of reference, this book not only provides an illuminating history of political science, told via Dahl and his critics, it also offers a revealing analysis as to what progress we have made in our thinking on pluralism and democracy, and what progress we could make, given the epistemological constraints of the social sciences. Above and beyond

this, the development and the problems of pluralism and democracy are explored in the context of the process of modernization. The author specifically discusses the extent to which individualization, differentiation and rationalization contribute to the current political malaise in those countries which adhere to a pluralist political system.

**The Economy and Political Culture in New Democracies: An Analysis of Democratic Support in Central and Eastern Europe**

- Kristin J. Broderick  
2017-11-22

This title was first published in 2000: This research examines the socio-economic and cultural factors that influence the development of democracy, and also explores how new democracies can be maintained and consolidated. It investigates the consolidation of new democracies in Central and Eastern Europe, which face the hurdle of transforming their economies. The study looks at the effect of economic

factors on popular support for democracy and discusses what factors influence citizen commitment to democratic regimes in Central and Eastern Europe. It argues that citizen perception of well-being is an important element in influencing political support. Case studies cover developing democracies in Europe, such as the Czech Republic or Slovakia, and policy implications, specifically in terms of economic policy, are offered that may aid democracies in their consolidation.

**Comparative Politics** - Judith Bara 2009-03-19

'Bara and Pennington's edited

volume successfully fills a huge void in the market for introductory textbooks to comparative politics which previously offered either descriptions of political processes and systems or overviews of the methodology of comparative analysis. By applying major political science theories to overviews of the core elements of political systems, the authors both enhance our understanding of these elements and provide readers an excellent introduction to comparative explanation' - Dr David Howarth, University of Edinburgh 'What is distinctive about this authoritative and comprehensive book on comparative politics is the way in which it is underpinned throughout by a theoretical analysis centred on a new institutionalist approach' - Professor Wyn Grant, University of Warwick 'Comparative Politics takes a fresh and original approach to the field... it examines the role of structures, rules and norms in regulating the individual and

collective behaviour of political actors. Each chapter provides a critical bibliography and key questions which will be particularly useful for students approaching Comparative Politics for the first time. Altogether this is a comprehensive and useful read which I warmly recommend' - Ian Budge, Professor Emeritus Professor of Government, University of Essex 'This is a most useful book. Teachers of comparative politics often scramble around, with out-of-date textbooks and photocopies of more or less compatible articles. Here is a new book that gives an up-to-date, comprehensive and systematic introduction to the major strands of institutional thought and applies these to the major institutions, processes and policy areas. It will be a great help for many of us, academics and students alike' - Peter Kurrild-Klitgaard, Professor of Comparative Politics, University of Copenhagen This book provides a distinctive new introduction to the study of comparative politics at

undergraduate level. Rich in case study material and global in coverage, Comparative Politics sets out the basic theoretical and methodological foundations for studying different political systems as well as the key structures and actors of which they are comprised. Part One explores the nature of comparative methodology and introduces students to the major theoretical paradigms that seek to explain the operation of institutions in democratic states and facilitate comparison across different political systems. Part Two examines the institutional structures of the modern state, outlining the key features such as the electoral systems and territorial and functional divisions of government across a range of modern states. Part Three analyzes the role of key actors, such as voters and parties, interest groups and social movements, the bureaucracy and the judiciary. This book will be an essential primer for students on first-year courses in comparative

government and politics as well as introductory courses in political science concepts and methods. Judith Bara is Senior Lecturer in Politics at Queen Mary, University of London and Research Fellow in Government, University of Essex. David S. Bell is Professor of French Government and Politics and Head of Social Studies and Law at the University of Leeds. Jocelyn Evans is Reader in Politics at the European Studies Research Institute, University of Salford. Catherine Needham is Lecturer in Politics at Queen Mary, University of London. This book offers a comprehensive analysis of the determinants of EU support between 2006 and 2015, and of electoral behavior during the European Parliament elections. In light of the Eurozone financial and debt crisis, it also examines how political and economic turbulences have affected EU citizens' stance on democracy and their support for EU institutions. It explores measures taken in the context

of the Euro crisis management and the reactions of EU citizens, in order to shed new light on the determinants and developments of EU support. The author highlights the heterogeneity of the developments between the member states and identifies social, political, and economic facets of the crisis that have changed the ways citizens form their political attitudes towards the EU. The book delivers a profound account of the Euro crisis, integrating approaches from political economy, psychology, sociology, and public opinion research. It will appeal to scholars and anyone interested in learning more about the declining citizen support in the EU and the heterogeneous developments in the member states, which may significantly endanger the long-term existence of the European Union.

**Political Culture and Leadership in India** - Bharati Mukherjee 1991-01-01

*Explaining Global Poverty* - Branwen Gruffydd Jones

2007-01-24

The twenty-first century is characterized by extremes of poverty and wealth, of scarcity and abundance. The vast inequalities of wealth distribution between the developed west and the impoverished developing world is a complex problem. This book recognises that Africa in particular has manifested this global disgrace and symbolizes the nature of poverty to the western world. In order to truly emancipate the poverty stricken around the world we must necessarily understand the reasons for its existence. In a departure from traditional critical realist theory, Gruffydd-Jones argues the benefits of reassessing the relevance of objective inquiry and emphasizes its primacy over normative theory in the battle to truly understand the reasons for the African crisis. This approach brings us a book of real relevance for inequality in the modern world and gives us an important platform from which to move forwards in the fight against poverty.

## **The Limits of Public Choice -**

Lars Udehn 2002-09-11

Public choice has been one of the most important developments in the social sciences in the last twenty years. However there are many people who are frustrated by the uncritical importing of ideas from economics into political science. Public Choice uses both empirical evidence and theoretical analysis to argue that the economic theory of politics is limited in scope and fertility. In order to arrive at a more comprehensive understanding of political life, political scientists must learn from both economists and sociologists.

State-Formation and Democratization - Thomas

Denk 2018-07-16

This book examines the connection between two major developments in the world:

state-formation and democratization. Since 1946, the number of states has increased from 66 to almost 200 independent states, but our knowledge of these state-formation processes is limited. The authors present a new database on state-formation and democratization, which enables novel classifications and analyses of these processes on the global level. They argue that the form of state-formation affects the probability for democratization in new states and that the initial regime that state-formation establishes at the time of independence has long-term effects on new states' democratization.

*Comparative Politics* - J. C.

Media, Communication and the Struggle for Democratic Change - Katrin Voltmer  
2019-08-28

This book investigates the role of media and communication in processes of democratization in different political and cultural contexts. Struggles for

democratic change are periods of intense contest over the transformation of citizenship and the reconfiguration of political power. These democratization conflicts are played out within an increasingly complex media ecology where traditional modes of communication merge with new digital networks, thus bringing about multiple platforms for journalists and political actors to promote and contest competing definitions of reality. The volume draws on extensive case study research in South Africa, Kenya, Egypt and Serbia to highlight the ambivalent role of the media as force for democratic change, citizen empowerment, and accountability, as well as driver of polarization, radicalization and manipulation.

Furthermore, the chapter on Political Culture includes more in-depth coverage of gender and representation in the era of the #MeToo movement.

Importantly, issues around migration and how different countries respond are explored in Chapter 24 on Globalization. An unrivalled amount of empirical material in the text and in the supporting online resources illustrates key similarities and differences of political systems in practice. The wealth of empirical data also encourages students to go beyond the 'what' of comparison to the 'how'. **The New Institutional Politics** - Svante Ersson

2002-01-31

The New Institutional Politics is a comparative study of the impact of political institutions upon outcomes, and covers some of the major themes in the new institutionalism. It looks at how various democratic institutions like Konkordanzdemokratie or corporatism promote better outcomes than Westminster institutions. The evaluation of the performance of political institutions covers the executive, the legislature and the judicial system. The book also looks at economic outcomes such as affluence and GDP growth as well as social ones like income distribution and quality of life. It examines the problems of institutional effects in democracies and dictatorships and provides analysis of some of the major models in political science. This is an exploration of how political institutions matter for political, economic and social outcomes. It estimates their impact in relation to other major factors such as culture and social structure. It is

written for political scientists and graduates studying comparative politics.

**In Search of Political Stability** - Edmund A. Aunger 1981

Comparative Politics Today - Gabriel Abraham Almond 2002-08

The Handbook of Political Behavior - Samuel Long 2012-12-06

In the writing of prefaces for works of this sort, most editors report being faced with similar challenges and have much in common in relating how these challenges are met. They

acknowledge that their paramount objective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed. The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists, graduate students, and, occasionally, advanced undergraduate students. Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided, then generally conclude that no particular classification strategy is superior. In elaborating on the process by which the enterprise was initiated, editors typically resort to a panel of luminaries, who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them. Editors usually concede that chapter topics and content do

not reflect their original conception but are a compromise between their wishes and the authors' expertise and capabilities. Editors report that inevitable delays occur, authors drop out of projects and are replaced, and new topics are introduced. Finally, editors frequently confess that the final product is incomplete, with gaps occurring because of failed commitments by authors or because authors could not be secured to write certain chapters.

On Parties, Party Systems and Democracy - Peter Mair  
2014-09-01

This collection brings together some of the most significant and influential work by leading comparativist Peter Mair (1951-2011). The selection ranges from considerations on the relevance of concept formation to the study of party systems and party organisations; and from reflections on the democratic legitimacy of the European Union to the future of party democracy. Including

frequently cited papers alongside lesser-known work, the writings collected in this volume attest to the broad scope and depth of Mair's insights into comparative party politics, and the changing realities of party government. As such, they form an important and enduring contribution to the study of politics, and a fitting tribute to an inspirational and much-missed figure in the global political science community. Edited and introduced by Ingrid van Biezen, with an intellectual portrait of Peter Mair by Stefano Bartolini and Hans Daalder.

A History of International Political Theory - Hartmut Behr  
2009-12-18

Contemporary theory of international politics faces a twofold problem: the critical engagement with legacies of national power politics in connection to 20th Century International Relations and the regeneration of notions of

humanity. This book contributes to this engagement by a genealogy of thoughts on war, peace, and ethics.

**Maestri of Political Science -**

Donatella Campus 2011-06-01

This book continues the editors' work (started in the volume "Masters of Political Science") of highlighting and re-evaluating the contributions of the most important political scientists who have gone before. Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political "giants" whose contributions are presented and analysed:

Gabriel A. Almond, Raymond Aron, Philip Converse, Maurice

Duverger, Stanley Hoffmann, Paul Lazarsfeld, Arend Lijphart, Elinor Ostrom, William H. Riker, Stein Rokkan and Susan Strange. The editors review and consider the contributions of these maestri to the study of contemporary democracy, political culture, electoral systems, political communication, the transformation of capitalism and state formation in Europe. Maestri of Political Science is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows.
