Automatic Cyberbullying Detection: Emerging Research and Opportunities - Ptaszynski, Michal E. 2018-11-02

Due to the prevalence of social network service and social media, the problem of cyberbullying has risen to the forefront as a major social issue over the last decade. Internet hate, harassment, cyberstalking, cyberbullying—these terms, which were almost unknown 10 years ago—are in the everyday lexicon of all internet users. Unfortunately, it is becoming increasingly difficult to undertake continuous surveillance of websites as new ones are appearing daily. Methods for automatic detection and mitigation for online bullying have become necessary in order to protect the online user experience. Automatic Cyberbullying Detection: Emerging Research and Opportunities provides innovative insights into online bullying and methods of early identification, mitigation, and prevention of harassing speech and activity. Explanations and reasoning for each of these applied methods are provided as well as their pros and cons when applied to the language of online bullying. Also included are some generalizations of cyberbullying as a phenomenon and how to approach the problem from a practical technology-backed point of view. The content within this publication represents the work of deep learning, language modeling, and web mining. It is designed for academicians, social media moderators, IT consultants, programmers, education administrators, researchers, and professionals and covers topics centered on identification methods and mitigation of internet hate and online harassment.

Manganese Catalysis in Organic Synthesis - Jean-Baptiste Sortais 2021-12-20

Manganese Catalysis in Organic Synthesis A must-read reference for anyone interested in catalyst design and sustainable organic synthesis In Manganese Catalysis in Organic Synthesis, distinguished researcher Jean-Baptiste Sortais delivers an insightful and robust overview of the use of manganese in homogenous catalysis. The editor includes papers from authoritative academics describing the organometallic precursors

used to develop manganese catalysts and covers critical applications in organic synthesis, including reduction to oxidation reactions, C-C, C-N, C-X bond formation reactions, cross-coupling reactions, C-H bond activation to dihydroxylation and epoxidation reactions. Manganese Catalysis in Organic Synthesis is a practical resource for every organic chemist in academia and industry with an interest in non-noble metal catalysis, organic synthesis, and sustainable chemistry. It is intuitively and clearly organized, covering the most important synthetic procedures using homogenous manganese catalysts. It is also the ideal companion to works like Cobalt Catalysis in Organic Synthesis, Nickel Catalysis in Organic Synthesis, and Iron Complexes in Catalysis. Readers will also enjoy: Thorough introductions to organometallic manganese compounds in organic synthesis and manganese-catalyzed hydrogenation and hydrogen transfer reactions A comprehensive exploration of manganese-catalyzed hydrogen borrowing reactions and dehydrogenative coupling reactions Practical discussions of manganese-catalyzed hydrosilylation and hydroboration reactions and manganese-catalyzed electro- and photocatalysis transformations In-depth examinations of manganese-catalyzed C-H oxygenation reactions and manganese-catalyzed organometallic C-H activation Insightful treatments of manganese-catalyzed cross-coupling processes and manganese(III) acetate mediated cyclizations Perfect for catalytic, organic, and pharmaceutical chemists, Manganese Catalysis in Organic Synthesis deserves a place in the libraries of researchers and professionals interested in catalyst design and sustainable organic synthesis.

Al- Hidayah (The Guidance) Vol 1 - Burhan Al Din Al Farghani Al Marghinani 2017-06-03

The Hidayah has dominated the field of Islamic jurisprudence since the day it was written over 800 years ago. It has been the primary text used by Muslims jurist to issue authentic and reliable rulingson Islamic law according to the school of Imam Abu Hanifa (d 150H/767CE). The Hidayah commands such an authoritative position amongst the doctors of law that the knowledge of a scholar ho has not read it is not considered reliable. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated into English by Charles Hamilton in 1791. Around 70 huge commentaries, some spread over more than a dozen volumes have been written on it. The number of explanatory glosses is in thousands. Comprehensive in content and conveniently organized, with the publication of this all previous workds that discussed Islamic jurisprudence according to the Hanafi law become outmoded and soon fell into disuse. If revealed books are not taken into account, never has a book received so much attention as the Hidayah. This landmark publication of the Hidayah not only has been translated in its entirety for the first time but has been done so from Arabic, the language in which it was written.

Al-Fiqh Al-Islami According to the Hanafi Madhhab - Muḥammad Akram Nadwī 2007

Al-Fiqh Al-Islami is the first complete Hanafi Fiqh text book to be written in English. Meticulously referenced from a multitude of classical sources and having incorporated many current day issues, it promises to be the most comprehensive Hanafi Fiqh compendium available in English today.

Sects & Sectarianism - Bhikkhu Sujato 2011-01-13

Why are there so many schools of Buddhism? Are the differences just cultural, or do they have fundamentally different visions of Dhamma? This work assesses the claims of the traditions, and takes into account to findings of modern scholarship. It pays special attention to the origins of the monastic orders. If we are to understand the differences, and sometimes tensions, between the schools of Buddhism today, we must examine more closely the forces that spurred their formation.

[The Qur'an](#) - Muhammad Abdullah Draz 2017-10-10

This book is unique in its approach to the Qur'an. It argues the point that only God could author such a book, and that Muhammad could have never produced anything like it. While this objective has been attempted by several Muslim scholars who highlighted one aspect or another of the topics highlighted in the Qur'an, Dr. Draz's work is perhaps the first that relies totally on the merits of the Qur'anic text for an irrefutable proof. Dr. Draz discusses the arguments made at the time of the Prophet and later on which suggested that the Qur'an was taught to Muhammad by various teachers, and shows how they all collapse at the first test. When he has irrefutably established the fact that the Qur'an could only be a divine revelation, Dr. Draz goes on to analyze the Qur'anic style, showing how it combines merits that could never be found together in any human writing. Equipped with a profound literary sense and a powerful Arabic style, Dr. Draz discusses the main characteristics of the Qur'anic style, as well as the unity of theme that runs through each chapter, or surah. The work is now presented to English readers as it gives students of the Qur'an valuable insight, enabling them to understand the Qur'an better.

The Concept of Coexistence in Islamic Primary Sources - Ali Shehata Abdou Selim 2015-02-27

The terms 'coexistence', 'partnership', 'citizenship' and 'globalization' all have a profound impact on today's decision makers and their policy formation, as well as on individuals. While these terms have been widely used all over the world, particularly in the West, in the construction of identity, they have been considered unworthy of a detailed analysis in the context of Muslim identity. Some scholars argue that Muslim-Christian relations are caught between advocates of homogenization, on the one hand, and supporters of self-affirmation on the other. While the former concept favours relativism, the latter is seen to encourage fanaticism. In addition, such scholars claim that the tension between Muslims and Christians is due to a complex history of rivalry and war, which has led to the issue of Muslims' positive coexistence being elucidated from historical and sociological points of view. Given the paucity of literature regarding a faith-based study of Muslim coexistence, this book elaborates on the theological aspect of Muslims' coexistence in non-Muslim lands, and raises a number of theological questions, arguments and counter-arguments pertinent to this issue. Is it permissible for Muslims to live in a non-Muslim country? Is it permissible for Muslims to acquire non-Muslim citizenship? What are the obstacles? How do Muslims perceive civic duties in non-Muslim countries? Are Muslims obliged to fulfil them? The book presents a number of scholarly discussions from past and contemporary sources, as well as international human rights treaties, which stress the significance of the much-overlooked factor of context.

Introduction to Radar Using Python and MATLAB - Lee Andrew (Andy) Harrison 2019-10-31

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear

understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

The Religion of Al-Islam and Marriage - Arifa Hudda 2017-05-24

This book is one of the many Islamic publications distributed by Mustafa Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Mustafa Organization is a registered Organization that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi'a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization's purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought!

Blessings of Salawat - Shaykh Faisal Abdur-Razak 2020-12-28

Blessings of Ṣalawāt: Upon the Holy Prophet Muḥammad ﷺ is a practical spiritual manual concisely organized to better understand the importance of conferring blessings upon the Beloved Prophet Muḥammad ﷺ. This work is the second title in the Wirdul 'Aam Series. The series outlines the Spiritual significance of the Wirdul 'Aam Dhikr formulated by Imam Abul Ḥasan Ash-Shādhilī (RA), as it pertains to the Dhikr of Ṣalawāt or the conferring of blessings upon the Messenger of Allah ﷺ. Almighty Allah ﷻ directs us in Sūratul Aḥzāb, "Verily, Allah and His angels send blessings on the Messenger of Allah. O you who believe, invoke blessings on him, and salute him with a worthy salutation." Our purpose of invoking blessings upon the Beloved ﷺ leads to close proximity to Almighty Allah ﷻ by obeying this command, while simultaneously fulfilling our rights upon the Messenger of Allah ﷺ. It is crystal clear how important the invocation of Ṣalawāt is for the believer, and it is a Mercy of Almighty Allah ﷻ for its rewards to be multitudinous. Abundant Ṣalawāt upon the Beloved ﷺ leads to loving him and knowing his beautiful qualities. By that virtue, degrees of purity are realized. From the signs of the people of the Sunnah is sending Ṣalawāt upon him, for the key to all goodness is Ṣalawāt upon the Messenger of Allah ﷺ.

Islam Is Your Birthright -

Each person is born in a religious environment that is not of his/her own choice. From the very beginning of human existence in this world, they are assigned the religion of their family or the ideology of the state. By the time individuals reach their teens they usually accept the beliefs of their parents or that of their particular society. However, when some people mature and are exposed to other beliefs and ideologies, they begin to question the validity of their own beliefs. Seekers of truth often reach a point of confusion upon realizing that believers of every religion, sect, ideology and philosophy all claim to have the one and only correct religion or ideology. There are only three possibilities. They are either all correct; all wrong or only one is correct and the rest are wrong.

Towards Understanding of Tadmuriyyah - Shaykh-Al-Islam Ibn Taymiyyah 2018-11-26

The Tadmuriyyah is a treatise written by Ibn Taymiyyah. The famous scholar of Islam, who strives always against the Bid'ah (innovation) until the end of his life, yet he did not stop his journey to the truth. So it is not strange that he said "What could my enemies possibly do to me? My paradise is in my heart; wherever I go it goes with me, inseparable from me. For me, prison is a place of (religious) retreat; execution is my opportunity for martyrdom; and exile from my town is but a chance to travel." He has many books written in different fields of knowledge. This treatise discussed the Aqeedah; which included names and its attributes of Allah (ﷻ); Shari'ah and Al-Qadar, which considers the vital part of Islamic religion. It is also one of the most important books used in Salafi to shape the Aqeedah. This treatise is about some answers related to Aqeedah given to the students of Tadmur. Here Ibn Taymiyyah indicates that it is obligatory for the seeker of Tawhid to firmly believe on whatever Allah says about Himself and to deny whatever Allah denies about Himself; the duty of 'Ibad towards command is to obey, towards prohibition is to avoid, after that he should seek forgiveness from

Allah(ﷻ). This treatise has many explanations but Taqrib Tadmuriyyah is considered as one of the best among these explanations; given by Shaykh al-Uthaymeen.

Stories of the Prophets - Sayyed Abul Hasan Ali Nadwi 2017-06-03

The prophets were chosen by Allah to guide mankind to the Divine Path. They faced many difficulties and suffered severe hardships in their efforts to call their straying people to obey and worship Allah. This edition of *Stories of the Prophets* presents the lives of Allah's prophets (peace and blessing be upon them). The stories were written by the renowned Islamic scholars Maulana Sayyed Abul Hasan Ali Nadwi. He is one of the greatest living authorities on Islam and his works are used as textbooks through the Arab and Muslim world. This translation from a major Arabic work provides English speaking Muslims with the benefits of Maulana Sayyed Abul Hasan's scholarship. The stories which have been drawn from the Holy Quran constantly reflect the authors depth of knowledge. They are written in a lively style with subtleties explained and descriptions vividly portrayed to provide the reader with a clear picture of each Prophet's mission. Each story is a delight to read and should provide both adults and children with a fresh insight into the life of the men Allah chose to guide their communities. The story of the last Prophet has not been included in this edition as it deserves a book to itself. To ensure that young people receive all the guidance, knowledge and inspiration that *Stories of the Prophets* offers, a workbook is included.

Allah's Prophets - Ibn Kathir 2015-10-08

God made the mountains and the seas. He made all the animals. He made the heavens and the stars. He made the sun and the moon and He made the angels. Then Allah decided to make a man. He called this first man Adam. He taught him many things so that Adam had more knowledge than the angels. There was one Jinn, called Iblis, the Devil. Iblis tried to compare himself to Adam. He believed that he was more honorable than Adam. Therefore he abstained from prostrating even though Allah had commanded him to do so. Adam was surprised by this creature, Iblis who abhorred him without even knowing him and who imagined himself better than Adam without having proved that he was worthier. Allah gives His commissioned creatures' absolute freedom even to the extent that they can refuse His commands. Allah grants them the freedom of denial, disobedience, and even disagreement with Him. His kingdom will not diminish if the disbelievers do not believe in Him nor will it be extended if many people believe in Him.

Photocatalysis - Jinlong Zhang 2018-10-11

This book describes the photocatalytic mechanism, factors affecting photocatalytic activity, design and preparation of different kinds of nanostructured photocatalysts, and their applications in the environmental and energy fields. Further, it illustrates a broad range of modification methods including ion-doping, heterojunction, noble metal deposition, morphological control and sensitizations, which are used to extend the light absorption range of photocatalysts and reduce recombination between electrons and holes. Promising applications include water splitting, contaminant decomposition and photocatalytic reduction of CO₂, which are closely related to environmental redemption and new energy development. The book offers an intriguing and useful guide for a broad readership in various fields of catalysis, material sciences, environment and energy.

The Best Way to Live and Die - Donald W. Flood 2020-10-22

Every day the sun shines on new people recognizing the truth and returning to their Creator in repentance and submission to Him. Ambitious for the promised reward of eternal happiness in Paradise, these new followers give renewed enthusiasm to the believers of today with their sincerity, keenness and solid adherence to the divine teachings. From their vast experiences in the past, they command strong endurance and a unique appreciation of their newly found path to which God has guided them, finding their way with easiness and surety in life. They discovered God's guidance and came to it on His terms-with open minds and clear consciences resolving to follow the truth wherever and

with whomever it lay. Many of them had reached satiety and disgust with materialistic lifestyles and turned back to humankind's original religion with true love for purity and homage to their Creator. In this book one such seeker of the truth, Donald W. Flood from the United States, relates the amazing story of his quest for divine guidance and true faith. Blessed with success and happiness in the right path of God, the author would love no more than to share this great good and source of peace with his fellow human beings.

Plasmonic Catalysis - Pedro H.C. Camargo 2021-06-21

Explore this comprehensive discussion of the foundational and advanced topics in plasmonic catalysis from two leaders in the field *Plasmonic Catalysis: From Fundamentals to Applications* delivers a thorough treatment of plasmonic catalysis, from its theoretical foundations to myriad applications in industry and academia. In addition to the fundamentals, the book covers the theory, properties, synthesis, and various reaction types of plasmonic catalysis. It also covers its applications in reactions including oxidation, reduction, nitrogen fixation, CO₂ reduction, and more. The book characterizes plasmonic catalytic systems and describes their properties, tackling the integration of conventional methods as well as new methods able to unravel the optical, electronic, and chemical properties of these systems. It also describes the fundamentals of controlled synthesis of metal nanoparticles relevant to plasmonic catalysis, as well as practical examples thereof. *Plasmonic Catalysis* covers a wide variety of other practical topics in the field, including hydrogenation reactions and the harvesting of LSPR-excited charge carriers. Readers will also benefit from the inclusion of: A thorough introduction to plasmonic catalysis, a theory of plasmons for catalysis and mechanisms, as well as optical properties of plasmonic-catalytic nanostructures An exploration of the synthesis of plasmonic nanoparticles for photo and electro catalysis, as well as plasmonic catalysis towards oxidation reactions and hydrogenation reactions Discussions of plasmonic catalysis for multi-electron processes and artificial photosynthesis and N₂ fixation An examination of control over reaction selectivity in plasmonic catalysis Perfect for catalytic chemists, materials scientists, photochemists, and physical chemists, *Plasmonic Catalysis: From Fundamentals to Applications* will also earn a place in the libraries of physicists who seek a one-stop resource to enhance their understanding of applications in plasmonic catalysis.
