*Assessing Languages for Specific Purposes* - Dan Douglas 2000  
Testing language for specific purposes (LSP) refers to that

branch of language testing in which the test content and test methods are derived from an analysis of a specific language use situation, such as Spanish for business, Japanese for tour guides, Italian for language teachers, or English for air traffic control. LSP tests are usually contrasted with general purpose language tests, in which purpose is more broadly defined, as in the Test of English as a Foreign Language. This book is the first to examine the issues surrounding the implementation of tests for specific purposes. It includes an in-depth discussion of the issues, an examination of the current exams, and a comprehensive overview of the literature. It will be a welcome addition to any language teaching professionals library.

### **Learning Oriented**

**Assessment** - Neil Jones

2016-05-19

This volume outlines the general principles of Learning Oriented Assessment (LOA), placing it in the context of European language learning

policy. The authors pose three key questions central to LOA: 'What is learning?', 'What is to be learned?' and 'What is to be assessed?'. It focuses on the use of evidence, and how it can be collected and used to feed back into learning, overviews large-scale assessment as practised by Cambridge English and learning-oriented classroom assessment practices, and concludes with a look at implementing LOA in practice. With fresh insights into the role of assessment in supporting learning, this volume will be of considerable interest to assessment practitioners, teachers and academics, educational policy-makers and examination board personnel.

**Parallel Societies of International Students in Australia** - Catherine Gomes  
2021-09-30

Parallel Societies of International Students in Australia explores the social and cultural spaces that international students occupy in destination countries. It specifically examines the connections they make and the significance of this parallel society in helping them become resilient, empowered and self-sufficient. It further explores the way in which international students become disconnected from the family and friends they left behind at home, as well as from local communities. Drawing on a decade worth of research into the social,

cultural, real and digital spaces occupied by international students in Australia, the book also reflects on the biggest challenge humanity has faced in a hundred years; the COVID-19 global pandemic. It considers the impact that the decisions made by the Australian government and international education stakeholders in response to this evolving crisis have had on international students. This book will be of interest to academics and stakeholders involved in international education and working with international students.

**Handbook of Second Language Assessment** - Dina Tsagari 2016-03-07

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses

on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language

assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

**Validity in Educational and Psychological Assessment** -

Paul Newton 2014-04-15

Lecturers, request your electronic inspection copy to review it for your course.

Validity is the hallmark of quality for educational and psychological measurement. But what does quality mean in this context? And to what, exactly, does the concept of validity apply? These apparently innocuous questions parachute the unwary inquirer into a minefield of tricky ideas. This book guides you through this minefield, investigating

how the concept of validity has evolved from the nineteenth century to the present day.

Communicating complicated concepts straightforwardly, the authors answer questions like: What does 'validity' mean?

What does it mean to 'validate'? How many different kinds of validity are there?

When does validation begin and end? Is reliability a part of validity, or distinct from it?

This book will be of interest to anyone with a professional or academic interest in evaluating the quality of educational or psychological assessments, measurements and diagnoses.
