Discovering Psychology: The Science of Mind - John T. Cacioppo 2012-03-16

In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it.

Doing Social Psychology - Dorothy Miell 1998

Dancing on Water is both a personal coming-of-age story and a sweeping look at ballet life in Russia and the United States during the golden age of dance. Elena Tchernichova takes us from her childhood during the siege of Leningrad to her mother's alcoholism and suicide, and from her adoption by Kirov ballerina Tatiana Vecheslova, who entered her into the state ballet school, to her career in the American Ballet Theatre. As a student and young dancer with the Kirov, she witnessed the company's achievements as a citadel of classic ballet, home to legendary names-- Shelest, Nureyev, Dudinskaya, Baryshnikov--but also a hotbed of intrigue and ambition run amok. As ballet mistress of American Ballet Theatre from 1978 to 1990, Elena was called "the most important behind-the-scenes force for change in ballet today," by Vogue magazine. She coached stars and corps de ballet alike, and helped mold the careers of some of the great dancers of the age, including Gelsey Kirkland, Cynthia Gregory, Natalia Makarova, and Alexander Godunov. Dancing on Water is a tour de force, exploring the highest levels of the world of dance.

Grit - Angela Duckworth 2016-05-03

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers--from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among *Grit*'s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm

embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).
