The Coming Prince - Robert Anderson
2007-04-01

He was one of the most popular lay preachers and Christian apologists of his day: Sir Robert Anderson devoutly believed that the Bible was the inerrant word of God, and in this popular 1881 book-a companion to his *Daniel in the Critics' Den*-he mounts a defense of the prophetic Old Testament Book of Daniel, an early example of apocalyptic philosophy in Christianity. Students of the Bible will appreciate this historically valuable attempt to set straight the many controversies surrounding Daniel regarding its authorship and even the date of its writing. And anyone interested in the apocalyptic fervor of modern-day fundamentalist Christianity will find this an instructive and enlightening read. While at Scotland Yard, Irish police official and religious scholar SIR ROBERT ANDERSON (1841-1918) helped investigate the Jack the Ripper murders, but he is best remembered for his works of Bible study,

including *Forgotten Truths and The Silence of God*.

German Soccer Passing Drills - Peter Hyballa
2015-08-15

Train like the World Champions! Over the past few years, a new trend has become ever more prominent in the soccer world: passing often, fast, and including all players in the game. Combining this with their own personal style, we have seen teams reach new heights of success from FC Barcelona to Bayern Munich and Borussia Dortmund and, most recently, the German National Team at the 2014 World Cup in Brazil. But what does it take to learn this 'art' of passing? What are the methodological and technical requirements for becoming the new Schweinsteiger, Messi, or Neuer? In this book, the only of its kind, two German League certified coaches have created the ultimate guide to passing. Using the "Hyballa-te Poel-Passing-Puzzle," they present every type of pass there is in modern soccer, with lots of drills for each

type. From the goalkeeper to the center forward, everyone can learn passing with these exercises.

Critique of Violence - Beatrice Hanssen
2014-02-25

Critique of Violence is a highly original and lucid investigation of the heated controversy between poststructuralism and critical theory. Leading theorist Beatrice Hanssen uses Walter

Benjamin's essay 'Critique of Violence' as a guide to analyse the contentious debate, shifting the emphasis from struggle to dialogue between the two parties. Regarding the questions of critique and violence as the major meeting points between both traditions, Hanssen positions herself between the two in an effort to investigate what critical theory and poststructuralism have to offer each other. In the course of doing so, she assembles imaginative new readings of Benjamin, Arendt, Fanon and Foucault, and incisively explores the politics of recognition, the violence of language, and the future of feminist theory. This groundbreaking book will be essential reading for all students of continental philosophy, political theory, social studies and comparative literature. Play the Budapest Gambit - Andrew Martin

101-01-01

The Budapest Gambit 1 d4 Nf6 2 c4 e5) is an aggressive, dynamic approach for meeting 1 d4 and is a great line for throwing opponents onto their own resources. It is certainly double-edged as Black moves the same piece twice early on and also sacrifices a pawn. This pawn is often quickly regained but one of the great advantages of the Budapest is that if White tries to hang on to the pawn (and many players do) Black can quickly whip up a ferocious attack. A great number of materialistic but unprepared White players have found themselves swiftly demolished by Black's tremendously active pieces. When White is more circumspect and allows Black to regain the pawn, play proceeds along more sedate strategic lines where Black enjoys free and easy development. Experienced chess author and coach Andrew Martin examines all key variations of the Budapest. There is an emphasis on typical middlegame structures and the important plans and

manoeuvres are demonstrated in numerous instructive games. * Includes complete repertoires for Black with both 3...Ng4 and 3...Ne4 * Comprehensive coverage featuring several new ideas * Take your opponents out of their comfort zone!

Planning: Move by Move - Zenón Franco

2019-09-01

“First the idea and then the move!” Miguel Najdorf used to say in his habitually enthusiastic fashion; that statement is the perfect summary of planning in chess. Planning is of crucial importance in chess and yet this is an area that has not been well discussed or explained to ambitious players who wish to improve. A very well known saying in chess is “Better a bad plan than no plan at all”. Playing without a plan – effectively staggering from one move to the next – is a recipe for disaster. It is essential to have some kind of idea of what you are trying to achieve and how to go about it. However, planning is not a straightforward matter. A good plan might be very short, lasting just two or three moves. Another plan might require almost an entire game to implement. A plan can be highly ambitious and complex or somewhat modest and simple. In chess, as in life, circumstances can change quickly and when

they do, new plans are needed. How is a player expected to juggle all these different concepts while dealing with the immediate problems posed by the opponent’s most recent move? In this book, grandmaster and experienced author Zenón Franco explains planning in detail. He organises material in terms of: typical structures, advantage in space, manoeuvring play, simplification and, finally attack and defence. Using games played by elite players he explains how plans are formed and carried out in these different scenarios. If you want to take your game to the next level, then *Planning Move by Move* will enable you to do this.

The Purpose of the Tribulation - Eugene Crockett 2018-02-15

Have you ever wondered what the purpose of

the Tribulation is and why it will last seven years? God always has a purpose for everything He does. The Tribulation is when the wrath of God is poured out on a world that has rejected God. Christians are taught throughout scriptures that they will escape the wrath of God through what is called the rapture. The world will experience disasters, famine, war, pain, and suffering which will wipe out most of the world's population before the Second Coming of Jesus. How awful that day will be! I have been inspired by the Holy Ghost to share with the reader the richness of God's word about The Purpose of the Tribulation to such a degree that you have never heard taught like this before. This book will teach you how to rightly divide the word of truth, understand what you read, search the scriptures to see if these things are true, and most importantly, how to avoid going through seven-years of God's wrath. You will be left with a greater appreciation for the word of God after discovering what most will not teach.

Advanced Technologies for Meat Processing - Fidel Toldrá 2017-10-10

As with the first edition, the main goal of Advanced Technologies for Meat Processing is to provide the reader with recent developments in new advanced technologies for the full meat-processing chain. This book is written by distinguished international contributors with recognized expertise and excellent reputations, and brings together all the advances in a wide and varied number of technologies that are applied in different stages of meat processing. This second edition contains 21 chapters, combining updated and revised versions of several chapters with entirely new chapters that deal with new online monitoring techniques like hyperspectral imaging and Raman spectroscopy, the use of nanotechnology for sensor devices or new packaging materials and the application of omics technologies like nutrigenomics and proteomics for meat quality and nutrition. The book starts with the control and traceability of

genetically modified farm animals, followed by four chapters reporting the use of online non-destructive monitoring techniques like hyperspectral imaging and Raman spectroscopy, real-time PCR for pathogens detection, and nanotechnology-based sensors. Then, five chapters describe different advanced technologies for meat decontamination, such as irradiation, hydrostatic and hydrodynamic pressure processing, other non-thermal technologies, and the reduction in contaminants generation. Nutrigenomics in animal nutrition and production is the object of a chapter that is followed by five chapters dealing with nutritional-related issues like bioactive peptides, functional meats, fat and salt reduction, processing of nitrite-free products, and the use

of proteomics for the improved processing of dry-cured meats. The last four chapters are reporting the latest developments in bacteriocins against meat-borne pathogens, the functionality of bacterial starters, modified atmosphere packaging and the use of new nanotechnology-based materials for intelligent and edible packaging.
