**The Supernatural, the Occult, and the Bible** - Gerald A. Larue 1990

Several New Age magazines have devoted stories to a burgeoning "Cult of the Goddess." But this cult isn't a result of the women's movement or the product of environmental consciousness - nor is it really new. In fact, the Catholic Church has been making use of a similar cult for two thousand years. In this book, Gerald A. Larue examines the scriptural underpinnings of occult and supernaturalistic notions that survive in contemporary society. The Supernatural, the Occult, and the Bible is based on the author's thorough knowledge of the history of ancient Near-Eastern cultures and their mythology. Larue argues that biblical supernaturalism and modern occultism are two sides of the same coin, and illustrates in fascinating detail how they engender and support each other. He suggests that contemporary religions cannot shirk responsibility for some of the more foolish excesses of occult practice. Larue points out that present-day churchgoers are not as a matter of course made aware of archaeological findings that shed light on scriptural teachings - research into biblical and related languages, literary analyses of biblical texts, and studies of the relationship between concepts found in the Bible and aspects of contemporary occult beliefs and practices - and explains why this is so. The breadth of Larue's research and depth of insight, and his

common sense approach, make this book both engrossing and important.

*A Science for the Soul* - Corinna Treitel 2004-04-20

In *A Science for the Soul*, historian Corinna Treitel explores the appeal and significance of German occultism in all its varieties between the 1870s and the 1940s, locating its dynamism in the nation's struggle with modernization and the public's dissatisfaction with scientific materialism. Occultism, Treitel notes, served as a bridge between traditional religious beliefs and the values of an increasingly scientific, secular, and liberal society. Drawing on a wealth of archival materials, Treitel describes the individuals and groups who participated in the occult movement, reconstructs their organizational history, and examines the economic and social factors responsible for their success. Building on this foundation, Treitel turns to the question of how Germans used the occult in three realms of practice: Theosophy, where occult studies were used to achieve spiritual enlightenment the arts, where occult states of consciousness fueled the creative process of avant-garde painters, writers, and dancers and the applied sciences, where professionals in psychology, law enforcement, engineering, and medicine employed occult techniques to solve characteristic problems of modernity. In conclusion, Treitel considers the conflicting meanings occultism held for contemporaries by focusing on the anti-spiritualist campaigns mounted by the national press, the Protestant and Catholic Churches, local and national governments, and the Nazi regime, which after years of alternating between affinity and antipathy for occultism, finally crushed the movement by 1945.

**Breast & Gynecological Diseases** - Mahesh K. Shetty 2021-06-24

This book is primarily a symptom-based guide to Breast and Gynecologic Imaging. Most clinical publications focus on a specific pathology such as "Imaging and/or management of ovarian cancer," but in clinical practice, patients do not present with a diagnosis. Physicians are presented with clinical symptoms, and appropriate use of imaging after a clinical assessment is critical from the point of view of effective intervention to treat a patient. CMS now mandates a clinical decision support system to justify imaging. This is based on making use of appropriate modalities for specific clinical problems that are deemed so by professional society guidelines. In an era of emphasis on cost effective, high quality health care delivery, it is critical for clinicians in training and practice to have a resource that outlines scientifically sound and professional society endorsed criteria for appropriate work up of patients' symptoms. This book applies this symptom-based approach to women's health. Authors are focused on providing a scientifically proven resource to gynecologists, obstetricians, radiologists and internists involved in the management of common symptoms affecting women. Each chapter is based on a common breast or gynecological problem and how patients are triaged for imaging. The implications of the findings and the most appropriate management of the patient are also presented. The text focuses on providing the most effective methods currently available to investigate commonly encountered symptoms in women's health. In addition, there are chapters that outline rationale of screening for breast cancer in women with an average risk and those with an elevated risk for breast cancer as well as a clinician guide to understanding multidisciplinary approach to the Breast cancer patient. This is an ideal guide for gynecologists, obstetricians, radiologists, and internists working in women's health.

[Stars and Stones on the Path](#) - Helena Petrovna Blavatsky, et al. 2019-03-10

Loyalty and devotion to Truth make up the right attitude. The aspirant must unlearn all that he knows, prepare himself for martyrdom, and begin to learn a new alphabet on the lap of Mother Nature, every letter of which will afford a new insight to him, every syllable and word, an unexpected revelation. Nature gives up her secrets and imparts true wisdom only to Philaletheians because they love Truth for her own sake.

Christianity has always put down and martyred those who have the audacity, in this time of social abasement and corruption, to live up to its ideals. The only scientific basis of morality is to be sought for in the doctrines of Lord Buddha and Sri Shankaracharya. Occultism requires unflinching loyalty and devotion to Truth. Otherwise, the faint-hearted will be ridiculed and chaffed by the masses, and partake in the terrible fate of Oedipus. But Truth should not be sought for intellectual acquisitiveness, pleasure, contempt of others, profit, fame, honour, promotion, and for other inferior ends. A clean life is the first step towards the Temple of Truth. An outward looking mindset, trapped in the gloom and doom of separateness, invariably gives rise to pessimism. But the abyss of despair has its advantages: 1 It encourages a mental U-turn from exterior preoccupations to interior realms of being and spirituality. It is like a chink in the dark prison walls of earth-life, through which breaks in a ray of light from the eternal home and which, illuminating the inner senses, whispers to the prisoner in his shell of clay the origin and the dual mystery of our being. 2 It is a tacit proof of the presence in man of that which knows, without being told, i.e., that there is another and a better life, once that the curse of earth-lives is lived through. Charity and mercy, harmlessness and humbleness, kindness and gentleness, define the right approach. Before you even think of treading the path, purify the material self. Otherwise you will end up degrading the spiritual. You have to fathom the mysteries of the heart, before you can hope to unravel the mysteries of the soul. Superhuman powers are stones on the path. Faculties and abilities will come naturally to those who are mentally and ethically fit to use them for the common good. Mere desire for powers is a form of selfishness, and receives no encouragement from our Teachers. If aroused prematurely, they will hinder rather than help. Self-interest can neither reveal the powers latent in man, nor can it alleviate the woes of the "Great Orphan." Take heed of the words of a Master of Wisdom. Even virtues can be vices in the eyes of the beholder. Silently and quietly endure what life brings, without expecting neither plaudits nor feedback. Pristine efforts cannot be thwarted by criticism and apathy. Nor can anyone hide from the all-seeing Law. Woe to those who live without suffering. Prerequisites for study and self-knowledge. · Awareness of the ignorance and deception of the world we live in. · Conviction that self-knowledge can be obtained by personal effort. · Determination to obtain and face that knowledge. Eastern Occultism is the origin and fount of all we know and can possibly learn. There is nothing new under the Sun, nothing new except what is forgotten. The aim of education proper is the art of revealing to the ignorant the world of thought and law, of marvels and mysteries, of moral beauty and ideal truth that lies within us and about us. The aim of science proper is to trace unity in diversity and to sum up the laws that govern their manifold operations in Nature. Reasoning out the unknown from the known and vice-versa, i.e., inductive and deductive reasoning, is what meditation proper is all about. Having reasoned out the Eternal and Universal, then by purity and virtue we may begin to ascend towards the "Sacred Majesty of Truth." Tarrying on the particulars will sink the mind in the shifting sands of doubt and despair, and any insight of the universals previously gained will be lost. One has to take into account that many of the extant Sanskrit authorities are far from being sacred. For no truly esoteric doctrines were ever written. Many things are orally explained, and always have been. In any case, intellectual study alone is never enough, unless corroborated by application, practice, and experience. Unselfishness is likely to aid the mind and protect it from error. Alas, too many Theosophists are content to read books and too few strive to further the interests of Brotherhood. If mastering a narrow domain of modern science requires years of unremitting study, how much longer will it take one to fathom out the world's religions and philosophies? Only those Lovers of Truth who are self-reliant and willing to think for themselves can hope to progress by working out a conceptual structure of the Teachings which (a) stands to reason and (b) explains every mystery, and triumphantly demonstrates the nature of every phenomenon. Key occult terms that will have to be understood by neophytes include: · Spirit and Matter, Force and Space; · Reality and Unreality, Formless and Form, Dream and Waking. · Subjective and Objective, both as sensuous and as psychic perceptions. Arguments, contentions, objections, and dissensions about the Teachings stifle intuition and are likely to sever the link between Guru and Chela. Immoral atmosphere saps siddhis. Co-operation with Nature, diligent study, fortitude and perseverance in the face of adversity and, above all, unconditional love for humanity and all that lives, make up the right conduct. Aspirants to the narrow and thorny Path should be deeply studying the philosophy of Occultism before entering upon the practical training. One must ascend the Golgotha of sentient life step by step unaided, by his own

initiatives and exertions, ever moving onward and upward. Woe to him who, instead of studying the half-defaced landmarks, he pronounces them indecipherable. The Doctrine of Heart alone, can make of him an elect. You cannot be one with ALL, unless all your acts, thoughts and feelings synchronise with the onward march of nature. You can only approach ALL through unconditional love of, and devotion to, Humanity and all that lives by turning away from selfishness, which is the main of sin and sorrow. Don't even think of circumventing Karma through masterly inactivity. For inaction on the physical produces adverse effects on the spiritual planes. "Inaction in a deed of mercy becomes an action in a deadly sin." The physical inactivity of a Mahatman or a Raja Yogin is quite different from the that of solitary fakirs, hermits, and Hatha Yogins. The former are working for mankind on high spiritual realms; the latter are afflicted from spiritual selfishness here, on Earth, the plane of illusion, and the greatest of all hells. Stop pushing yourself forward. "Be restrained, be liberal, be merciful." Forget yourself in the midst of so many selves. Consider whether "turning the other cheek" may encourage offenders to re-offend. Stop abusing and tormenting animals, and eating their flesh. Desist from gossiping, for gossip fans flames! Condemn the sin, not the Sinner within. Do not set yourself as example to others, for "the camel cannot see its own hump." But by example you can imprint upon the astral light pictures of higher aspirations and thus aid advanced souls from other spheres to descend. Stones on the Path. Practical Occultism is fraught with dangers. It requires total, unreserved and unswerving commitment, and loyalty to Truth. The aspirant must choose between the life of the World and the life of Occultism. After a pledge is given, any sensual or even mental self-gratification will forfeit the power of spiritual discrimination. And, regardless of motive, the renegade will retrogress and sink deeper into the mire. Only implicit faith to the Teachings and explicit service to mankind can admit the disciple to the Kingdom of Heaven. Neither success nor safety is to be found outside self-development. Woe to those who, driven by selfishness and vanity, dissent from the aim and ideals of the Theosophical Society and its motto. Disunity is the first condition of failure; rivalry, the second. Chelas, Disciples, Shrivakas, Upasans: united in thought and deed. The sine qua non of "Chelaship is a spirit of absolute unselfishness and devotion to Truth; then follow self-knowledge and self-mastery." Chelaship is a psychic solvent, which eats away all dross and leaves only the pure gold behind. Real gurus are not simply Adepts in Occult Sciences: they are Living Men of profound knowledge and noble ethics. They are masters of human nature and of the secrets of Nature herself. Entrance to the mysteries of Inner Life requires a pledge of seven years' probation. Unswerving faith, trust, and confidence to the Master are indispensable. But many are unworthy of the honour. "The results have been far from encouraging so far, and it is to show these unfortunates the cause of their failure as much as to warn others against rushing heedlessly upon a similar fate, that the writing of the present article has been ordered." Masters normally select Chelas from natural mystics in the East. Exceptions of accepted Chelas in the West include Fludd, Thomas Vaughan, Paracelsus, Pico della Mirandola, and Count de Saint-Germain. When you see the light, that light is from you and it is you.
