Christian Gnosis - Wolfgang Smith 2009-01
Basing himself principally upon the teachings of Saint Paul and the Clementine Stromata, the author begins the present treatise by distinguishing the

idea of gnosis in nascent Christianity from its Gnostic counterfeit. He then considers the implications of authentic gnosis for cosmology, a question that connects intimately with his earlier

studies, notably his ground-breaking work regarding the interpretation of quantum theory. The same considerations, however, which invalidate naive cosmology, have bearing on the theological notion of creatio ex nihilo as well; it is this crucial recognition that leads the author to consider alternative formulations within the Judeo-Christian tradition: from Christian Kabbalah to Jacob Boehme and Meister Eckhart. What emerges are the outlines of a Trinitarian nondualism definitive of Christian gnosis. Wolfgang Smith broaches a vast range of subjects with a mastery that bespeaks an immense culture. --Jean Borella Here is that rare person who is equally at home with Eckhart and Einstein, Heraclitus and Heisenberg! --Harry Oldmeadow Wolfgang Smith is as important a thinker as our times boast. --Huston Smith After graduating from Cornell University at age eighteen with majors in physics, mathematics and philosophy, Wolfgang Smith took an M.S. from

Purdue, following which he spent three years at Bell Aircraft Corporation as an aerodynamicist. During this period he gained recognition for his pioneering papers on the effect of diffusion fields, which provided a theoretical solution to the so-called re-entry problem for space flight. After receiving a Ph.D. in mathematics from Columbia University, Dr. Smith pursued a professorial career in that field. Soon however his center of interest shifted from the pursuit of science to the critique of scientism and the rediscovery of metaphysics as a theological discipline. He has authored six books and numerous articles, and is today widely recognized as a leading authority in these twin fields." The Spirit in Man, Art and Literature - Carl Gustav Jung 2003 The Spirit in Man, Art and Literature offers unique and penetrating insights into the lives and opinions of some of the most significant players in the cultural life of the twentieth century. Carl Gustav

Jung was at the heart of that cultural life, pioneering, along with Freud, a new interpretation of what it meant to be human in the modern age. This volume reveals the full range of Jung's involvement in this process, from his famous analysis of 'Psychology and Literature' to his landmark texts on Joyce's *Ulysses* and Picasso's paintings. Jung writes of Freud from the perspective of one who was "permitted a deep glimpse into the mind of this remarkable man," and through the memories and opinions recorded in *The Spirit in Man, Art and Literature*, the reader is offered a similar privilege.

Kimiya-e Saadat-The Alchemy of Happiness - Ghazzālī 2007

The Return of the Feminine and the World Soul -

Llewellyn Vaughan-Lee
2009-11-01

The feminine holds the mystery of creation. This simple and primordial truth is often overlooked, but at this time of global crisis, which also carries the seeds of a global

transformation, we need to reawaken to the spiritual power and potential of the feminine. Feminine qualities belong to both men and women, and they draw us into the depths within us, into the mysteries of the soul whose wisdom is called Sophia. Without the feminine nothing new can be born, nothing new can come into existence—we will remain caught in the materialistic images of life that are polluting our planet and desecrating our souls. We need to return to the core of our being, to where the sacred comes into existence. And the mystical feminine holds the key to this work of redemption and transformation. Over the past two decades Llewellyn Vaughan-Lee has given different teachings on the feminine and the anima mundi, the World Soul. They are compiled here for the first time. "Llewellyn Vaughan-Lee presents us with a clear picture of the Feminine which is now essential to building a new vision and value for our dear planet earth." —MARION

WOODMAN, Ph.D., Jungian Analyst and author “This book is the work of an alchemist—a vitally important contribution to the Great Work of rescuing the human soul from the darkness that currently shrouds it. In this dangerous transitional time, where ignorance, confusion and cruelty abound, its theme of the need for us to recover and comprehend the Feminine is of absolute and urgent relevance. Few people are able to define and evoke the Feminine in the way that Llewellyn Vaughan-Lee does; in poetic and beautiful prose, he speaks directly from his soul to ours, acting as advocate for the longing of the anima mundi, the World Soul, to be welcomed once again into our lives and our culture. He knows that this is the time of humanity’s awakening: each one of us participates in the mystery of the light hidden within us and within all nature that is being awakened. For exploring this mystery so directly and deeply and with such insight, he deserves our

deepest gratitude. Women and men alike will welcome and treasure this book.” —ANNE BARING, co-author, *The Myth of the Goddess: Evolution of an Image* and *The Dream of the Cosmos: A Quest for the Soul*
The Chemical Wedding of Christian Rosenkreutz - Joscelyn Godwin 1991-10-01
The Chemical Wedding of Christian Rosenkreutz, often looked upon as the third Rosicrucian manifesto, has an entirely different tone from the other Rosicrucian documents. Unlike the Rosicrucian manifestoes, which address the transformation of society, *The Chemical Wedding* is concerned with the inner transformation of the soul. It is a deeply interior work, one which asks the reader to step into its world of symbols and walk with Christian Rosenkreutz along his path of transformation. Despite its importance as a key text of the Western esoteric traditions, this is the first ever contemporary English translation of *The Chemical Wedding*, made especially for

this edition by Joscelyn Godwin. Also included in this edition is an introduction and commentary by Adam McLean, which illuminates the transformative symbolism.

El Retorno de la Femenidad Sagrada y el Alma del

Mundo - Llewellyn Vaughan-Lee 2014-01-01

Lo femenino contiene el misterio de la creación. Esta verdad simple y primordial a menudo pasa desapercibida. Sin embargo, en estos tiempos de crisis global, que a su vez portan las semillas de una transformación global, es necesario que redespertemos al poder espiritual y al potencial de lo femenino. Las cualidades femeninas forman parte tanto del hombre como de la mujer y nos empujan hacia las profundidades de nuestro ser, hasta los misterios del alma, cuya sabiduría se denomina Sofía. Sin lo femenino nada nuevo puede nacer, nada nuevo puede llegar a la existencia; quedaríamos atrapados en las imágenes materialistas de la vida que están contaminando nuestro

planeta y profanando nuestras almas. Tenemos que volver al centro de nuestro ser, al lugar donde lo sagrado se manifiesta en la existencia. Y la femineidad mística contiene la clave para poder llevar a cabo esta labor de redención y de transformación. En las últimas dos décadas Llewellyn Vaughan-Lee ha impartido enseñanzas sobre lo femenino y el anima mundi, el Alma del Mundo, que por primera vez han sido recopiladas en este libro.

The Art and Science of Heroism and Heroic Leadership - Scott T. Allison 2019-06-21

Heroism is a rich, elusive phenomenon. Any adequate understanding of heroic behavior requires a new type of scholarly imagination, one that taps into human artistic sensibilities as much as it does the rigors of scientific inquiry. In an important sense, we invoke a meta-version of the call to heroic imagination by Franco, Blau, and Zimbardo (2011), who describe such imagination "as a mind-set"

and “a collection of attitudes” (p. 13) that can steer everyday people toward heroic achievement. This eBook also merges our understanding of heroism with heroic leadership, demonstrating that heroic leadership applies the principles of heroism in moving groups toward noble collective goals. This eBook represents an effort by a distinguished group of authors to unleash their own creative mindsets, attitudes, and imaginations in their scholarship on heroism and heroic leadership.

Empowering Civil Society in the Industrial Revolution

4.0 - Sukowiyono 2021-10-05
ICCEDI is an international seminar that is held every two years organized by the Law and Citizenship Department, Faculty of Social Science Universitas Negeri Malang. The activities aim to discuss the theoretical and practical citizenship education that becomes needed for democracy in Indonesia and other countries with a view to build academic networks by gathering academics from

various research institutes and universities. Citizenship education is an urgent need for the nation in order to build a civilized democracy for several reasons. Citizenship education is important for those who are politically illiterate and do not know how to work the democracy of its institutions. Another problem is the increasing political apathy, indicated by the limited involvement of citizens in the political process. These conditions show how citizenship education becomes the means needed by a democratic country like Indonesia. The book addresses a number of important issues, such as law issues, philosophy of moral values, political government, socio-cultural and Pancasila, and civic education. Finally, it offers a conceptual framework for future democracy. This book will be of interest to students, scholars, and practitioners, governance, and other related stakeholders.

Dictionary of Alchemy - Mark Haeffner 2004

Alchemy is a rich and complex

esoteric tradition that has flourished world-wide since the beginning of recorded history, if not earlier. There are three main traditions: Western Christian, Indo-tibetan and Chinese Taoist. Within this diversity there are many common features, which are analysed, organized, and brought together in this comprehensive dictionary of terms, symbols, and personalities. This dictionary is the distillation of many years' research into the extensive arcane literature. It is a reference work to guide the readers through the labyrinth of pre-Newtonian science and philosophy. The dictionary covers not only the materialist dimension of the search for the elixir of life and the transmutation of metals, but also the inner search for the gold of mystical illumination. Jung called alchemy 'the projection of a drama both cosmic and spiritual in laboratory terms'. This opus alchymicum goes beyond the bare analysis and interpretation of terms to

present a harmonic, integrated vision of man and nature, which may help to heal the fragmented world view of modern science.

Liber 420 - Chris Bennett
2018-04-20

Although little known, cannabis and other psychoactive plants held a prominent and important role in the Occult arts of Alchemy and Magic, as well as being used in ritual initiations of certain secret societies. Find out about the important role cannabis played in helping to develop modern medicines through alchemical works. Cannabis played a pivotal role in spagyric alchemy, and appears in the works of alchemists such as Zosimos, Avicenna, Lull, Paracelsus, Cardano and Rabelais. Cannabis also played a pivotal role in medieval and renaissance magic and recipes with instructions for its use appear in a number of influential and important grimoires such as the Picatrix, Sepher Raxiel: Liber Salomonis, and The Book of Oberon. Could cannabis be the

Holy Grail? With detailed historical references, the author explores the allegations the Templars were influenced by the hashish ingesting Assassins of medieval Islam, and that myths of the Grail are derived from the Persian traditions around the sacred beverage known as haoma, which was a preparation of cannabis, opium and other drugs. Many of the works discussed, have never been translated into English, or published in centuries. The unparalleled research in this volume makes it a potential perennial classic on the subjects of both medieval and renaissance history of cannabis, as well as the role of plants in the magical and occult traditions.

Science of the Cosmos, Science of the Soul - William C. Chittick 2013-10-01

With academic courses either encouraging commercialism, or cultivating zealots, Chittick states that it is impossible to understand classical Islamic texts without the years of contemplative study that are

anathema to the modern education system. Insisting upon a return to the ways of the ancient wisdom tradition, which saw the quest for knowledge of the soul, the world, and God as a unifying spiritual discipline, Chittick maintains that the study of Islamic texts cannot be treated separately from self-understanding. Fascinating, radical, and a true challenge to modern trends in academic study, this book opens a new debate in Islamic thought.

Science and Technology in World History [2 volumes] -

William E. Burns 2020-02-29

This encyclopedia offers an interdisciplinary approach to studying science and technology within the context of world history. With balanced coverage, a logical organization, and in-depth entries, readers of all inclinations will find useful and interesting information in its contents. Science and Technology in World History takes a truly global approach to the subjects of science and technology and spans the

entirety of recorded human history. Topical articles and entries on the subjects are arranged under thematic categories, which are divided further into chronological periods. This format, along with the encyclopedia's integrative approach, offers an array of perspectives that collectively contribute to the understanding of numerous fields across the world, and over eras of development. Entries cover discussions of scientific and technological innovations and theories, historical vignettes, and important texts and individuals throughout the world. From the discovery of fire and the innovation of agricultural methods in China to the establishment of surgical practices in France and the invention of Quantum Theory, this encyclopedia offers comprehensive coverage of fascinating topics in science and technology through a straightforward, historical lens. Provides readers with a multicultural view of the evolution of science and

technology from prehistory to the present Covers both scientific theory and practical technology Encourages readers to think about science and technology in historical terms Places current conditions within a broad historical framework

Traditional Islamic

Environmentalism - Tarik M. Quadir 2013-09-16

This work examines the relevance of traditional Islamic thought and practices for a lasting solution to the current environmental crisis. The book argues that only a revival of the traditional worldview which perceives all entities of nature as signs of God can effectively respond to the crisis our planet faces.

The Basics of Chemistry -

Richard Myers 2003

This book covers the basic concepts found in introductory high-school and college chemistry courses.

Aladdin's Lamp - John Freely 2010-03-09

Aladdin's Lamp is the fascinating story of how ancient Greek philosophy and

science began in the sixth century B.C. and, during the next millennium, spread across the Greco-Roman world, producing the remarkable discoveries and theories of Thales, Pythagoras, Hippocrates, Plato, Aristotle, Euclid, Archimedes, Galen, Ptolemy, and many others. John Freely explains how, as the Dark Ages shrouded Europe, scholars in medieval Baghdad translated the works of these Greek thinkers into Arabic, spreading their ideas throughout the Islamic world from Central Asia to Spain, with many Muslim scientists, most notably Avicenna, Alhazen, and Averroës, adding their own interpretations to the philosophy and science they had inherited. Freely goes on to show how, beginning in the twelfth century, these texts by Islamic scholars were then translated from Arabic into Latin, sparking the emergence of modern science at the dawn of the Renaissance, which climaxed in the Scientific Revolution of the seventeenth century.

Rasa Shastra - Andrew Mason
2014-04-21

The first comprehensive analysis of Asian Medical Alchemy, this book describes the use of herbo-mineral-metal based medicines as used in some of the world's oldest healing traditions. It offers a detailed exploration of Âyurvedic medicinal purification practices that seek to enhance the therapeutic potential of materials, metals and gemstones, as well as offering a concise overview of traditional and modern equipment and methods used in the manufacture of these medicines. The author's unique and fascinating account of the hidden alchemical arts also explains some of the historical background behind the ongoing quest amongst Asian alchemists for immortality.

Green Hermeticism - Peter Lamborn Wilson 2007-05

Hermeticism, or alchemy, is the ancient, primordial mystery science of nature through which people in all times and places have, for the sake of world evolution, sought to

unite Heaven and Earth--divinity, cosmos, earth, and humanity, as a single whole. Selfless, intimate, dedicated to healing and harmony, Hermeticism has accompanied and sustained every religious epoch and revelation. It may be found in all historical cultures, from the traditions of India and China in the East to the Judeo-Christian West. It could even be said that Hermeticism is the primal cosmological revelation and the common ground of all spiritual traditions. Nevertheless, in the great revival of mystical, esoteric traditions and practices during the last century, Hermetic tradition--in fact, Nature herself--has been largely ignored. Today, when the Earth seems most under attack, Green Hermeticism is especially appropriate. The book explores not only the ancient Masters' inner science, but also their science of Nature. During spring and summer 2006, Pir Zia Khan convened a series of gatherings to begin to unfold the contemporary meaning of

ancient, sacred science for our time. Green Hermeticism is a partial record of that meeting. Peter Lamborn Wilson, explores the many ramifications of the alternative worldview offered by Hermeticism; Christopher Bamford provides a broad historical overview of the tradition from the Ancient Mysteries to contemporary manifestations of the alchemical tradition; while Kevin Townley brings a practical dimension to the gathering teaching the preparation of herbal elixirs and demonstrating that cosmology and philosophy can become a truly healing path for the Earth. Green Hermeticism is necessary reading for anyone seeking a spiritual and cultural path for the healing of the current ecological and cultural crisis. "In Alchemy, there is an injunction to quicken, or revive, the dead, which is illustrated by a dead tree growing verdant again. That is exactly what this wonderful and rare work does in awakening human

consciousness to its Divine potential and Ultimate Destiny. Art thus helps Nature to achieve its ideal Perfection. The authors must be congratulated for their insightful words. I wholeheartedly recommend reading it again and again, and again." --Stanislas Klossowski de Rola, author *Alchemy: The Secret Art and The Golden Game: Alchemical Engravings of the Seventeenth Century* "Environmental solutions today are largely technical, but the planetary crisis is also a crisis of soul--or better yet, of the Imagination. Too tricky for religion, too poetic for reductionist science, Green Hermeticism rehearses a prophetic imagination still in love with the material world--a new alchemy of ancient nature." --Erik Davis, author, *The Visionary State: A Journey through California's Spiritual Landscape* "Just when you felt numb and disenfranchised, thinking the world had become bleak and dead, along comes this rare, much needed book to remind us that there is still

some sanity, depth, and creative energy percolating up from the heart of Reality. Thank God (and the Goddess Nature) for this smart and inspiring breath of fresh air! Green Hermeticism is where the wasteland ends--and where the world becomes re-enchanted with genuine living thought that goes beyond superficialities. It's a rare pleasure to be in the presence of living minds who actually know something wonderful and have not been deadened by the opiates of capital or the tenure track. Very highly recommended." --David Fideler, publisher (Phanes Press) editor (Alexandria), author of *Jesus Christ, Sun of God* and translator of *Love's Alchemy: Poems from the Sufi Tradition* (with Sabrineh Fideler) "The publication of *Green Hermeticism* has the sense we so rarely get, of a genuine moment in cultural history. It is not just the eloquence of its authors' knowledge and arguments or that they are showing us, once again, the depth and range and

beauty of alchemy, and the Hermetic tradition, and what Peter Lamborn Wilson calls Romantic Science. Nor is it even the links they establish between the Hermetic tradition and ecology, and the value of a science that perceives the world as alive rather than a machine. What makes this work significant is the sense that it shows us how we can use these ideas and knowledge to create a genuine counter to destruction and despair, an alchemy of our politics as well as of our spirit." --Rachel Pollack, author of *78 Degrees of Wisdom: A Book of Tarot* "Green Hermeticism reminds us that the art of the Great Work is to enter more deeply into the dynamic and practical wisdom of the universe, which is our laboratory, where work and prayer combine. When we engage with the All, we know ourselves to be one kindred with all in the viriditas--God's greening power--where body, soul, and spirit honor each other." --Caitlín & John Matthews, authors of *Walkers Between the Worlds: The*

Western Mysteries from Shaman to Magus

Hemingway and Africa -

Miriam B. Mandel 2011

Hemingway's two extended African safaris, the first in the 1930s and the second in the 1950s, gave rise to two of his best-known stories ("The Snows of Kilimanjaro" and "The Short Happy Life of Francis Macomber"), a considerable amount of journalism and correspondence, and two nonfiction books, *Green Hills of Africa* (1935), about the first safari, and *True at First Light* (1999; longer version, *Under Kilimanjaro* 2005), about the second. Africa also figures largely in his important posthumous novel *The Garden of Eden* (1986). The variety and quantity of this literary output indicate clearly that Africa was a major factor in the creative life of this influential American author. But surprisingly little scholarship has been devoted to the role of Africa in Hemingway's life and work. To start the long-delayed conversation on this topic, this book offers historical,

theoretical, biographical, theological, and literary interpretations of Hemingway's African narratives. It also presents a wide-ranging introduction, a detailed chronology of the safaris, a complete bibliography of Hemingway's published and unpublished African works, an up-to-date, annotated review of the scholarship on the African works, and a bibliography of Hemingway's reading on natural history and other topics relevant to Africa and the world of the safari.

Artes - Pro und Kontra IV - Vilmos Dr Czikkely 2014-12-10

Aus der geistigen Erbmasse der römischen Spätantike entstanden zwei

Religionssysteme: das kaiserzeitliche Christentum und der Islam. Beide haben ihre spezifischen Probleme mit der Rezeption des vorgefundenen "Wissens der Alten" und mit den weltlich umtriebigen τέχναί/artes.

Beide Religionssysteme bilden spezifische atechnische Attraktionsbereiche: Diese könnten wir in der christlichen Tradition mit dem

augustinischen Terminus "civitas dei" charakterisieren (Kapitel V). Die aktuelle

Diskussion zeigt, dass die wichtigsten Ereignisse und Daten der muslimischen

Geschichte selbst unter den Gebildeten offensichtlich wenig bekannt sind. So brauchen wir,

bevor wir die "Einstellungen zu den artes" untersuchen, einen

differenzierenden Blick für die bedeutendsten Normen und Strömungen in der muslimischen Geisteswelt. Die Auseinandersetzung mit der geistigen Erbmasse der Antike hat von den drei Zweigen der artes die Wissenschaften und die Philosophie ganz anders erfasst als die produktiven Techniken und die künstlerische Gestaltung. Leitend war das Bild von der Urgemeinde.

Iran Facing Others - A. Amanat 2012-02-13

Iran's long history and complex cultural legacy have generated animated debates about a homogenous Iranian identity in the face of ethnic, linguistic

and communal diversity. The volume examines the fluid boundaries of pre-modern identity in history and literature as well as the shaping of Iranian national identity in the 20th century.

The Alchemy of Happiness - Ghazzālī 1910

Islamising Indonesia - Yon Machmudi 2008-11-01

The Prosperous Justice Party (PKS) is the most interesting phenomenon in contemporary Indonesian politics. Not only is it growing rapidly in membership and electoral support, it is also bringing a new and markedly different approach to Islamic politics, one which has no precedent in Indonesian history.

Understanding PKS and analysing its political behaviour presents challenges to scholars and observers. This is partly due to the fact that the party represents a new trend within Indonesian Islam which has few parallels with preceding movements. Yon Machmudi has rendered us a valuable service. In this book,

he provides a thoughtful and authoritative context for viewing PKS. He critiques the existing categorisations for Indonesian Islam and points to their inadequacy when describing the PKS and the campus-based Tarbiyah movement from which it sprang. He reworks the santri typology, dividing it into convergent, radical and global substreams. This offers new possibilities for explaining the PKS phenomenon and assists in differentiating between various types of Islamic revivalism in contemporary Indonesia. It also allows a more understanding of the accommodatory stance which PKS has towards the state and other political forces. Yon's text provides a good overview of the development of PKS from its Tarbiyah movement origins to its impressive success at the 2004 general elections. It considers the party's attitude towards the issues of sharia implementation and community welfare and closes by examining the future challenges facing PKS. It is a well written and authoritative

account from a scholar who has done wideranging research on the party.

Cosmos & Transcendence -

Wolfgang Smith 1984

With elegance and clarity, Wolfgang Smith leads the reader, step by step, to the realization that the specifically 'modern' world is based intellectually, not indeed upon scientific facts, but ultimately on nothing more substantial than a syndrome of Promethean myths. And this 'opening' enables him to recover and reaffirm the deep metaphysical insights that have come down to us through the teachings of Christianity: having broken the grip of scientific presuppositions, the author succeeds in bringing to view universal truths which had long been obscured.

The Arabic Hermes - Kevin van Bladel 2009-08-26

This is the first major study devoted to the early Arabic reception and adaption of the figure of Hermes Trismegistus, the legendary Egyptian sage to whom were ascribed numerous works on astrology, alchemy,

talismans, medicine, and philosophy. Before the more famous Renaissance European reception of the ancient Greek Hermetica, the Arabic tradition about Hermes and the works under his name had been developing and flourishing for seven hundred years. The legendary Egyptian Hermes Trismegistus was renowned in Roman antiquity as an ancient sage whose teachings were represented in books of philosophy and occult science. The works in his name, written in Greek by Egyptians living under Roman rule, subsequently circulated in many languages and regions of the Roman and Sasanian Persian empires. After the rise of Arabic as a prestigious language of scholarship in the eighth century, accounts of Hermes identity and Hermetic texts were translated into Arabic along with the hundreds of other works translated from Greek, Middle Persian, and other literary languages of antiquity. Hermetica were in fact among the earliest translations into Arabic,

appearing already in the eighth century. This book explains the origins of the Arabic myth of Hermes Trismegistus, its sources, the reasons for its peculiar character, and its varied significance for the traditions of Hermetica in Asia and northern Africa as well as Europe. It shows who pre-modern Arabic scholars thought Hermes was and how they came to that view.
Sufi - 2005

[The House of Wisdom](#) - Jim Al-Khalili 2011-03-31

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al-Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier.

With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

In the Paradise of the Sufis - Javād Nūrbakhsh 1979

IN THE PARADISE OF THE SUFIS is a classic manual of Sufi practices. It introduces and describes in detail the five disciplines practiced in the Nimatullahi Sufi Order.

Names, Natures and Things - Syed Nomanul Haq 2012-12-06

Jabir ibn Hayyan, for a long time the reigning alchemical authority both in Islam and the Latin West, has exercised numerous generations of scholars. To be sure, it is not only the vexed question of the historical authorship and dating of the grand corpus Jabirianum which poses a serious scholarly challenge; equally challenging is the task of unraveling all those obscure and tantalizing discourses

which it contains. This book, which marks the first full-scale study of Jabir ever to be published in the English language, takes up both challenges. The author begins by critically reexamining the historical foundations of the prevalent view that the Jabirian corpus is the work not of an 8th-century individual, but that of several generations of Shi'i authors belonging to the following century and later. Tentatively concluding that this view is problematic, the author, therefore, infers that its methodological implications are also problematic. Thus, developing its own methodological matrix, the book takes up the second challenge, namely that of a substantive analysis and explication of a Jabirian discourse, the Book of Stones. Here explicating Jabir's notions of substance and qualities, analyzing his ontological theory of language and unraveling the metaphysics of his Science of Balance, the author reconstructs the doctrinal context of the Stones and

expounds its central theme. He then presents an authoritative critical edition of a substantial selection of the text of the Stones, based on all available manuscripts. This critical edition has been translated in its entirety and is provided with exhaustive commentaries and textual notes -- another pioneering feature of this book: for this is the first English translation of a Jabirian text to emerge in print after a whole century. An outstanding contribution is that it announces and presents an exciting textual discovery: the author has found in the Stones a hitherto unknown Arabic translation of part of Aristotle's Categories. Given that we have so far known of only one other, and possibly later, classical Arabic translation of the Greek text, Haq's discovery gives this book an historical importance. [Including the Earth in Our Prayers](#) - Llewellyn Vaughan-Lee 2019-04-01

Including the Earth in Our Prayers tells a story of love and prayer, how spiritual practice is not just for ourselves, our

own journey, but for life itself. It steps back to reclaim the wisdom of our ancestors, including the "Original Instructions" of Indigenous peoples—instructions that describe how we need to "get along" with all of creation—and relates these teachings to the need of our present time. With our ecosystem in crisis and our culture increasingly divisive, it suggests ways in which the energy and transformative potential of our spiritual nature can be applied to these critical issues, and reconnects us with a spiritual understanding of the living Earth. The simple premise of this book is that there is a vital need to shift our collective culture from a story of separation and exploitation into a new story of living oneness, and that spiritual practice, and the love and light it generates, have an essential part to play in this shift. (Including the Earth in Our Prayers is a revised and updated edition of Awakening the World: A Global Dimension to Spiritual Practice, which was originally published in 2006.)

“The call of the soul in our time is to become loving partners with our world in manifesting the potentials of blessing and wholeness innately within us and within the Earth. In this wonderful book, Llewellyn eloquently shows us that we each have within us the power to answer this call and embody this partnership. In a time when we are beset with fear and divisiveness, he offers a vision of wholeness and healing, hope and empowerment. It is definitely a book whose time has come.” —David Spangler, author of *Journey into Fire* “Llewellyn Vaughan-Lee is a rare mystic who honors the eternal truths of the wisdom traditions while recognizing the ever-evolving ways that these truths must be accessed and lived... this book opens our eyes and hearts to the true potential of spiritual practice to go beyond self-transformation to play a vital role in the well-being and awakening of the Earth as a whole. He suggests that ours is a time when new pathways are being revealed that use

spiritual practice as a way of nourishing the whole of life, pointing the way to a form of spiritual service that belongs to the future.” —David T. Nicol, author of *Subtle Activism: The Inner Dimension of Social and Planetary Transformation* “... this luminous book shows us the way to navigate these tumultuous times with a clear mind, a hopeful heart, and a renewed relationship with holy awe. In *Including the Earth in Our Prayers*, Vaughan-Lee, one of the great wisdom teachers of our age, invites us to participate in nothing less than the radical rebirth of all that is.” —Mirabai Starr, author of *God of Love and Wild Mercy* “The Earth is luminous. From being a dark and degraded “thing,” the earth is in reality an angelic being. Our relationship with the Earth, not one of domination but one grounded in harmony, adoration, and contemplation is a powerful indicative of our relationship with the Divine, with the feminine, and ultimately with the entire realm of the Spirit. Llewellyn

Vaughan-Lee opens up this connection in a lucid and luminous way. Highly recommended for devotees of spiritual pursuit and ecological sustainability.” —Omid Safi, author of *Radical Love: Teachings from the Islamic Mystical Tradition*; Professor, Duke University; Leader, Illuminated Tours “As we enter the Anthropocene era when no part of the world remains untouched by the human imprint, the need for action is urgent. Any talk now of contemplation or spirituality might appear to be self-centered, and much of what passes for spirituality has fallen into this quagmire. But as Llewellyn Vaughan-Lee shows us, ‘Real spiritual practice is never for ourself alone, but always for the whole, always for the sake of the Beloved.’ Drawing on the deep tradition of Sufi wisdom, *Including the Earth in our Prayers* is a call to place the wellbeing of the Earth at the center of our spiritual practice. With lucidity, grace, and wisdom, Vaughan-Lee has

given us a cleverly disguised resistance manual for our time.” —Fred Bahnson, author *Soil & Sacrament: A Spiritual Memoir of Food and Faith*, and director of the Food, Health, and Ecological Well-Being Program at Wake Forest University School of Divinity
Al-Kimia - John Eberly 2005-02
Al-Kimia-The Mystical Islamic Essence of the Sacred Art Of Alchemy by John Eberly presents a condensed history of Alchemy told through concise biographies of early Sufi Masters. Chapters examine occult areas of alchemical and spiritual interest such as jafr, an exegetical Qur'anic science akin to Hebrew Qabala; the Qiyamat or 'Great Resurrection', of the heretical Ismaili sect; the contrary path of the saintly Malamatiyya or 'blameworthy ones'; Hermetic color theory, and 'hidden' art history. A glossary of transliterated terms is appended that will greatly help the beginner as well as the advanced student of these subjects.

Persepolis - Ali Mousavi

2012-04-19

Persepolis: Discovery and Afterlife of a World Wonder presents the first full study of the history of archaeological exploration at Persepolis after its destruction in 330 BC. Based in part on archival evidence, anecdotal information, and unpublished documents, this book describes in detail the history of archaeological exploration, visual documentation, and excavations at one of the most celebrated sites of the ancient world. The book addresses a broad audience of readers ranging from students of the archaeology, history, and art history of ancient, medieval, and modern Iran to scholars in Classical Studies and Ancient Near Eastern Studies.

Encyclopedia of Ancient Egypt - Margaret Bunson

2014-05-14

An A-Z reference providing concise and accessible information on Ancient Egypt from its predynastic cultures to the suicide of Cleopatra and Mark Anthony in the face of the Roman conquest. Annotation.

Bunson (an author of reference works) has revised her 1991 reference (which is appropriate for high school and public libraries) to span Egypt's history from the predynastic period to the Roman conquest. The encyclopedia includes entries for people, sites, events, and concepts as well as featuring lengthy entries or inset boxes on major topics such as deities, animals, and the military. A plan and photograph are included for each of the major architectural sites.

Muslim Environmentalisms -

Anna M. Gade 2019-08-20

How might understandings of environmentalism and the environmental humanities shift by incorporating Islamic perspectives? In this book, Anna M. Gade explores the religious and cultural foundations of Islamic environmentalisms. She blends textual and ethnographic study to offer a comprehensive and interdisciplinary account of the legal, ethical, social, and empirical principles underlying Muslim commitments to the

earth. Muslim Environmentalisms shows how diverse Muslim communities and schools of thought have addressed ecological questions for the sake of this world and the world to come. Gade draws on a rich spectrum of materials—scripture, jurisprudence, science, art, and social and political engagement—as well as fieldwork in Indonesia and Southeast Asia. The book brings together case studies in disaster management, educational programs, international development, conservation projects, religious ritual and performance, and Islamic law to rethink key theories. Gade shows that the Islamic tradition leads us to see the environment as an ethical idea, moving beyond the established frameworks of both nature and crisis. Muslim Environmentalisms models novel approaches to the study of religion and environment from a humanistic perspective, reinterpreting issues at the intersection of numerous academic disciplines to

propose a postcolonial and global understanding of environment in terms of consequential relations.
