## **Memories, Dreams, Reflections** - C. G. Jung 2011-01-26

An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. *Memories, Dreams, Reflections* is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII Sermones ad Mortuos.

## **Written in Stone** - Sanford Levinson 2018-10-26

Twentieth Anniversary Edition with a new preface and afterword From the removal of Confederate monuments in New Orleans in the spring of 2017 to the violent aftermath of the white nationalist march on the Robert E. Lee monument in Charlottesville later that summer, debates

and conflicts over the memorialization of Confederate “heroes” have stormed to the forefront of popular American political and cultural discourse. In *Written in Stone* Sanford Levinson considers the tangled responses to controversial monuments and commemorations while examining how those with political power configure public spaces in ways that shape public memory and politics. Paying particular attention to the American South, though drawing examples as well from elsewhere in the United States and throughout the world, Levinson shows how the social and legal arguments regarding the display, construction, modification, and destruction of public monuments mark the seemingly endless confrontation over the symbolism attached to public space. This twentieth anniversary edition of *Written in Stone* includes a new preface and an extensive afterword that takes account of recent events in cities, schools and universities, and public spaces throughout the United States and elsewhere. Twenty years on, Levinson's work is more timely and relevant than ever.

**Slavery in the Age of Memory** - Ana Lucia Araujo 2020-10-15

Exploring notions of history, collective memory, cultural memory, public memory, official memory, and public history, *Slavery in the Age of Memory: Engaging the Past* explains how ordinary citizens, social groups, governments and institutions engage with the past of slavery and the Atlantic slave trade. It illuminates how and why over the last five decades the debates about slavery have become so relevant in the societies where slavery existed and which participated in the Atlantic slave trade. The book draws on a variety of case studies to investigate its central questions. How have social actors and groups in Europe, Africa and the Americas engaged with the slave past of their societies? Are there any relations between the demands to rename streets of Liverpool in England and the protests to take down Confederate monuments in the United States? How have black and white social actors and scholars influenced the ways slavery is represented in George Washington's Mount Vernon and Thomas Jefferson's Monticello in the United States? How do slave cemeteries in Brazil and the United States and the walls of names of Whitney Plantation speak to other initiatives honoring enslaved people in England and South Africa? What shared problems and goals have led to the creation of the International Slavery Museum in Liverpool and the National Museum of African American History and Culture in Washington DC? Why have artists used their works to confront the debates about slavery and its legacies? The important debates addressed in this book resonate in the present day. Arguing that memory of slavery is racialized and gendered, the book shows that more than just attempts to come to terms with the past, debates about slavery are associated with the persistent racial inequalities, racism, and white supremacy which still shape societies where slavery existed. *Slavery in the Age of Memory: Engaging the Past* is thus a vital resource for students and scholars of the Atlantic world, the history of slavery and public history.

**The Red Book: A Reader's Edition** - C. G. Jung 2012-12-17

Presents the Swiss psychologist's thoughts, experiences, and everything he felt after a period of time spent seeing visions, hearing voices, and

inducing hallucinations.

**How People Learn** - National Research Council 2000-08-11

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

**The Texture of Memory** - James Edward Young 1994-01-01  
Dotyczy m. in. Polski.

**The Stages of Memory** - James E. Young 2018-04-11

From around the world, whether for New York City's 9/11 Memorial, at exhibits devoted to the arts of Holocaust memory, or throughout

Norway's memorial process for the murders at Utøya, James E. Young has been called on to help guide the grief stricken and survivors in how to mark their losses. This poignant, beautifully written collection of essays offers personal and professional considerations of what Young calls the "stages of memory," acts of commemoration that include spontaneous memorials of flowers and candles as well as permanent structures integrated into sites of tragedy. As he traces an arc of memorial forms that spans continents and decades, Young returns to the questions that preoccupy survivors, architects, artists, and writers: How to articulate a void without filling it in? How to formalize irreparable loss without seeming to repair it? Richly illustrated, the volume is essential reading for those engaged in the processes of public memory and commemoration and for readers concerned about how we remember terrible losses.

**The Problem of Free Choice** - Saint Augustine (of Hippo) 1955

One of Augustine's most important works, written between 388 and 395, this dialogue has as its objective not so much to discuss free will for its own sake as to discuss the problem of evil in reference to the existence of God, who is almighty and all-good.

*The City as Subject* - Carolyn S. Loeb 2022-02-24

In *The City as Subject*, Carolyn S. Loeb examines distinctive bodies of public art in Berlin: legal and illegal murals painted in West Berlin in the 1970s and 1980s, post-reunification public sculptures, and images and sites from the street art scene. Her careful analyses show how these developed new architectural and spatial vocabularies that drew on the city's infrastructure and daily urban experience. These works challenged mainstream urban development practices and engaged with citizen activism and with a wider civic discourse about what a city can be. Loeb extends this urban focus to her examination of the extensive outdoor installation of the Berlin Wall Memorial and its mandate to represent the history of the city's division. She studies its surrounding neighborhoods to show that, while the Memorial adopts many of the urban-oriented vocabularies established by the earlier works of public art she examines, it truncates the story of urban division, which stretches beyond the

Wall's existence. Loeb suggests that, by embracing more multi-vocal perspectives, the Memorial could encourage the kind of participatory and heterogeneous construction of the city championed by the earlier works of public art.

*Edmund Burke* - F. P. Lock 1998

This is the first full, scholarly biography of Burke for over a generation, to be completed in two volumes. The first volume covers the years between 1730-1784, and describes his Irish upbringing and education, early writing, and his parliamentary career throughout the momentous years of the American War of Independence.

*I Remember Nothing* - Nora Ephron 2010-11-09

Nora Ephron returns with her first book since the astounding success of *I Feel Bad About My Neck*, taking a cool, hard, hilarious look at the past, the present, and the future, bemoaning the vicissitudes of modern life, and recalling with her signature clarity and wisdom everything she hasn't (yet) forgotten. Ephron writes about falling hard for a way of life ("Journalism: A Love Story") and about breaking up even harder with the men in her life ("The D Word"); lists "Twenty-five Things People Have a Shocking Capacity to Be Surprised by Over and Over Again" ("There is no explaining the stock market but people try"; "You can never know the truth of anyone's marriage, including your own"; "Cary Grant was Jewish"; "Men cheat"); reveals the alarming evolution, a decade after she wrote and directed *You've Got Mail*, of her relationship with her in-box ("The Six Stages of E-Mail"); and asks the age-old question, which came first, the chicken soup or the cold? All the while, she gives candid, edgy voice to everything women who have reached a certain age have been thinking . . . but rarely acknowledging. Filled with insights and observations that instantly ring true—and could have come only from Nora Ephron—I Remember Nothing is pure joy.

*The Destruction of Memory* - Robert Bevan 2007-04-20

A decimated Shiite shrine in Iraq. The smoking World Trade Center site. The scorched cityscape of 1945 Dresden. Among the most indelible scars left by war is the destroyed landscapes, and such architectural devastation damages far more than mere buildings. Robert Bevan argues

herethat shattered buildings are not merely “collateral damage,” but rather calculated acts of cultural annihilation. From Hitler’s Kristallnacht to the toppling of Saddam Hussein’s statue in the Iraq War, Bevan deftly sifts through military campaigns and their tactics throughout history, and analyzes the cultural impact and catastrophic consequences of architectural destruction. For Bevan, these actions are nothing less than cultural genocide. Ultimately, Bevan forcefully argues for the prosecution of nations that purposely flout established international treaties against destroyed architecture. A passionate and thought-provoking cri de coeur, *The Destruction of Memory* raises questions about the costs of war that run deeper than blood and money. “The idea of a global inheritance seems to have fallen by the wayside and lessons that should have long ago been learned are still being recklessly disregarded. This is what makes Bevan’s book relevant, even urgent: much of the destruction of which it speaks is still under way.”—Financial Times Magazine “The message of Robert Bevan’s devastating book is that war is about killing cultures, identities and memories as much as it is about killing people and occupying territory.”—Sunday Times “As Bevan’s fascinating, melancholy book shows, symbolic buildings have long been targeted in and out of war as a particular kind of mnemonic violence against those to whom they are special.”—The Guardian

[The Securitization of Memorial Space](#) - Nicholas S. Paliewicz 2019-11

*The Securitization of Memorial Space* argues that the National September 11 Memorial and Memorial Museum is a securitized site of memory—what Foucault called a *dispositif*—that polices visitors and publics to remember trauma, darkness, and victimage in ways that perpetuate the “necessity” of the Global War on Terrorism. Contributing to studies in public memory, rhetoric and argumentation, and critical security studies, Nicholas S. Paliewicz and Marouf Hasian Jr. show how various human and nonhuman actors participated in complicated argumentative formations that have mobilized political, performative, and militaristic practices of anti-terroristic violence in other parts of the world. While there were times that certain argumentative stakeholders—such as local New Yorkers—questioned the necessity of

securitizing this site of memory, agentic factions including the families of those who died on 9/11, public supporters, security agents, and politicians created an ideologically oriented security assemblage that remembers 9/11 through counter-terroristic performances at Ground Zero. In chronological order from the 2001 “dustbowl” to the present popularization of 9/11 memories, the authors present seven chapters of rich rhetorical analysis that show how the National September 11 Memorial and Memorial Museum perpetuates grief, uncertainty, and angst that affects public memory in multidirectional ways.

*The Collective Memory Reader* - Jeffrey K. Olick 2011-01-21

In the last few decades, there are few concepts that have rivaled “collective memory” for attention in the humanities and social sciences. Indeed, use of the term has extended far beyond scholarship to the realm of politics and journalism, where it has appeared in speeches at the centers of power and on the front pages of the world’s leading newspapers. Seen by scholars in numerous fields as a hallmark characteristic of our age, an idea crucial for understanding our present social, political, and cultural conditions, collective memory now guides inquiries into diverse, though connected, phenomena. Nevertheless, there remains a great deal of confusion about the meaning, origin, and implication of the term and the field of inquiry it underwrites. *The Collective Memory Reader* presents, organizes, and evaluates past work and contemporary contributions on collective memory. Combining seminal texts, hard-to-find classics, previously untranslated references, and contemporary landmarks, it will serve as a key reference in the field. In addition to a thorough introduction, which outlines a useful past for contemporary memory studies, *The Collective Memory Reader* includes five sections—Precursors and Classics; History, Memory, and Identity; Power, Politics, and Contestation; Media and Modes of Transmission; Memory, Justice, and the Contemporary Epoch—comprising ninety-one texts. A short editorial essay introduces each of the sections, while brief capsules frame each of the selected texts. An indispensable guide, *The Collective Memory Reader* is at once a definitive entry point into the field for students and an essential resource for scholars.

**Denying the Holocaust** - Deborah E. Lipstadt 2012-12-18

The denial of the Holocaust has no more credibility than the assertion that the earth is flat. Yet there are those who insist that the death of six million Jews in Nazi concentration camps is nothing but a hoax perpetrated by a powerful Zionist conspiracy. Sixty years ago, such notions were the province of pseudohistorians who argued that Hitler never meant to kill the Jews, and that only a few hundred thousand died in the camps from disease; they also argued that the Allied bombings of Dresden and other cities were worse than any Nazi offense, and that the Germans were the “true victims” of World War II. For years, those who made such claims were dismissed as harmless cranks operating on the lunatic fringe. But as time goes on, they have begun to gain a hearing in respectable arenas, and now, in the first full-scale history of Holocaust denial, Deborah Lipstadt shows how—despite tens of thousands of living witnesses and vast amounts of documentary evidence—this irrational idea not only has continued to gain adherents but has become an international movement, with organized chapters, “independent” research centers, and official publications that promote a “revisionist” view of recent history. Lipstadt shows how Holocaust denial thrives in the current atmosphere of value-relativism, and argues that this chilling attack on the factual record not only threatens Jews but undermines the very tenets of objective scholarship that support our faith in historical knowledge. Thus the movement has an unsuspected power to dramatically alter the way that truth and meaning are transmitted from one generation to another.

*Memory, History, Forgetting* - Paul Ricoeur 2009-01-01

Why do major historical events such as the Holocaust occupy the forefront of the collective consciousness, while profound moments such as the Armenian genocide, the McCarthy era, and France's role in North Africa stand distantly behind? Is it possible that history "overly remembers" some events at the expense of others? A landmark work in philosophy, Paul Ricoeur's *Memory, History, Forgetting* examines this reciprocal relationship between remembering and forgetting, showing how it affects both the perception of historical experience and the

production of historical narrative. *Memory, History, Forgetting*, like its title, is divided into three major sections. Ricoeur first takes a phenomenological approach to memory and mnemonical devices. The underlying question here is how a memory of present can be of something absent, the past. The second section addresses recent work by historians by reopening the question of the nature and truth of historical knowledge. Ricoeur explores whether historians, who can write a history of memory, can truly break with all dependence on memory, including memories that resist representation. The third and final section is a profound meditation on the necessity of forgetting as a condition for the possibility of remembering, and whether there can be something like happy forgetting in parallel to happy memory. Throughout the book there are careful and close readings of the texts of Aristotle and Plato, of Descartes and Kant, and of Halbwachs and Pierre Nora. A momentous achievement in the career of one of the most significant philosophers of our age, *Memory, History, Forgetting* provides the crucial link between Ricoeur's *Time and Narrative* and *Oneself as Another* and his recent reflections on ethics and the problems of responsibility and representation. “His success in revealing the internal relations between recalling and forgetting, and how this dynamic becomes problematic in light of events once present but now past, will inspire academic dialogue and response but also holds great appeal to educated general readers in search of both method for and insight from considering the ethical ramifications of modern events. . . . It is indeed a master work, not only in Ricoeur's own vita but also in contemporary European philosophy.”—Library Journal “Ricoeur writes the best kind of philosophy—critical, economical, and clear.”—New York Times Book Review

*In Memory Of* - Spencer Bailey 2020-10-21

Exploring the art, architecture, and design of memorials around the world from the late twentieth century to today Memorials hold a special position in the cultural memory of communities, cultures and nations, and *In Memory Of* demonstrates this as never before. This extraordinary and moving collection of more than 60 exceptional structures

commemorates some of the most destructive events of the 20th and 21st centuries, including war, genocide, massacre, terrorism, famine, and slavery. At the same time, *In Memory Of* shows that the power to overcome, to survive, even to forgive, is just as impactful and important. Thoughtful essays on the subjects of hope, strength, grief, loss, and fear help to contextualize the projects and address the emotional aspects of memorialization.

**Transforming the Workforce for Children Birth Through Age 8** - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their

individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

*Stages of Dying (sound Recording)*. - University of Minnesota 1972

**That Further Shore** - John D. Feerick 2020-04-21

A rare and evocative memoir of a respected constitutional scholar, dedicated public servant, political reformer, and facilitator of peace in the land of his ancestors. John D. Feerick's life has all the elements of a modern Horatio Alger story: the poor boy who achieves success by dint of his hard work. But Feerick brought other elements to that classic American success story: his deep religious faith, his integrity, and his paramount concern for social justice. In his memoir, *That Further Shore*, Feerick shares his inspiring story, from his humble beginnings: born to immigrant parents in the South Bronx, going on to practice law, participating in framing the U.S. Constitution's Twenty-Fifth Amendment, serving as dean of Fordham Law, and serving as President of the New York City Bar Association and chair of state commissions on government integrity. Beginning with Feerick's ancestry and early life experiences, including a detailed genealogical description of Feerick's Irish ancestors in County Mayo and his laborious quest to identify them and their relationships with one another, the book then presents an evocative survey of the now-vanished world of a working-class Irish Catholic neighborhood in the South Bronx. Feerick's account of how he financed his education from elementary school through law school is a moving tribute to the immigrant work ethic that he inherited from his parents and shared with many young Americans of his generation. The book then traces Feerick's career as a lawyer and how he gave up a lucrative partnership in a prestigious New York City law firm at an early

age to accept the office of Dean of the Fordham School of Law at a fraction of his previous income because he felt it was time to give back something to the world. John Feerick has consistently shown his commitment to the law as a vocation as well as a profession by his efforts to protect the rights of the poor, to enable minorities to achieve their rightful places in American society, and to combat political corruption. That Further Shore is an inspiring memoir of how one humble and decent man helped to make America a more just and equitable society.

**At Memory's Edge** - James Edward Young 2000-01-01

How should Germany commemorate the mass murder of Jews once committed in its name? In 1997, James E. Young was invited to join a German commission appointed to find an appropriate design for a national memorial in Berlin to the European Jews killed in World War II. As the only foreigner and only Jew on the panel, Young gained a unique perspective on Germany's fraught efforts to memorialize the Holocaust. In this book, he tells for the first time the inside story of Germany's national Holocaust memorial and his own role in it. In exploring Germany's memorial crisis, Young also asks the more general question of how a generation of contemporary artists can remember an event like the Holocaust, which it never knew directly. Young examines the works of a number of vanguard artists in America and Europe--including Art Spiegelman, Shimon Attie, David Levinthal, and Rachel Whiteread--all born after the Holocaust but indelibly shaped by its memory as passed down through memoirs, film, photographs, and museums. In the context of the moral and aesthetic questions raised by these avant-garde projects, Young offers fascinating insights into the controversy surrounding Berlin's newly opened Jewish museum, designed by Daniel Libeskind, as well as Germany's soon-to-be-built national Holocaust memorial, designed by Peter Eisenman. Illustrated with striking images in color and black-and-white, At Memory's Edge is the first book in any language to chronicle these projects and to show how we remember the Holocaust in the after-images of its history.

**Terrorism in American Memory** - Marita Sturken 2022-01-18

Introduction: The Politics of Memory in the Post-9/11 Era -- Monuments

and Voids: The Proliferation of 9/11 Memory -- The Objects That Lived, the Voices That Remain: The 9/11 Museum -- Global Architecture, Patriotic Skyscrapers, and a Cathedral Shopping Mall: The Rebuilding of Lower Manhattan -- Visibility and Erasure: Memory and the "Global War on Terror" -- The Memory of Racial Terror: The National Memorial for Peace and Justice and the Legacy Museum.

The Collected Works of D.W. Winnicott - Donald Woods Winnicott 2017

Shadowed Ground - Kenneth E. Foote 2013-12-06

Shadowed Ground explores how and why Americans have memorialized—or not—the sites of tragic and violent events spanning three centuries of history and every region of the country. For this revised edition, Kenneth Foote has written a new concluding chapter that looks at the evolving responses to recent acts of violence and terror, including the destruction of the Branch Davidian compound at Waco, Texas, the Oklahoma City bombing, the Columbine High School massacre, and the terrorist attacks of 9/11.

**What Can and Can't be Said** - Dell Upton 2015-01-01

"An original study of monuments to the civil rights movement and African American history that have been erected in the U.S. South over the past three decades, this powerful work explores how commemorative structures have been used to assert the presence of black Americans in contemporary Southern society. The author cogently argues that these public memorials, ranging from the famous to the obscure, have emerged from, and speak directly to, the region's complex racial politics since monument builders have had to contend with widely varied interpretations of the African American past as well as a continuing presence of white supremacist attitudes and monuments."--Book jacket.

**Zen-Brain Reflections** - James H. Austin 2010-09-24

A sequel to the popular Zen and the Brain further explores pivotal points of intersection in Zen Buddhism, neuroscience, and consciousness, arriving at a new synthesis of information from both neuroscience research and Zen studies. This sequel to the widely read Zen and the Brain continues James Austin's explorations into the key

interrelationships between Zen Buddhism and brain research. In *Zen-Brain Reflections*, Austin, a clinical neurologist, researcher, and Zen practitioner, examines the evolving psychological processes and brain changes associated with the path of long-range meditative training. Austin draws not only on the latest neuroscience research and new neuroimaging studies but also on Zen literature and his personal experience with alternate states of consciousness. *Zen-Brain Reflections* takes up where the earlier book left off. It addresses such questions as: how do placebos and acupuncture change the brain? Can neuroimaging studies localize the sites where our notions of self arise? How can the latest brain imaging methods monitor meditators more effectively? How do long years of meditative training plus brief enlightened states produce pivotal transformations in the physiology of the brain? In many chapters testable hypotheses suggest ways to correlate normal brain functions and meditative training with the phenomena of extraordinary states of consciousness. After briefly introducing the topic of Zen and describing recent research into meditation, Austin reviews the latest studies on the amygdala, frontotemporal interactions, and paralimbic extensions of the limbic system. He then explores different states of consciousness, both the early superficial absorptions and the later, major "peak experiences." This discussion begins with the states called kensho and satori and includes a fresh analysis of their several different expressions of "oneness." He points beyond the still more advanced states toward that rare ongoing stage of enlightenment that is manifest as "sage wisdom." Finally, with reference to a delayed "moonlight" phase of kensho, Austin envisions novel links between migraines and metaphors, moonlight and mysticism. The Zen perspective on the self and consciousness is an ancient one. Readers will discover how relevant Zen is to the neurosciences, and how each field can illuminate the other.

**Tell Me Your Life Story, Mom** - Questions About Me 2021-04-18

### **Preventing Bullying Through Science, Policy, and Practice** -

National Academies of Sciences, Engineering, and Medicine 2016-09-14  
Bullying has long been tolerated as a rite of passage among children and

adolescents. There is an implication that individuals who are bullied must have "asked for" this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life. Although bullying behavior endures through generations, the milieu is changing. Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators and school administrators, health care providers, policy makers, families, and others concerned with the care of children, this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.

**Cultural Memory** - Donald R. Wehrs 2022-11-29

Bringing together neuroscientists, social scientists, and humanities scholars in cross-disciplinary exploration of the topic of cultural memory, this collection moves from seminal discussions of the latest findings in

neuroscience to variegated, specific case studies of social practices and artistic expressions. This volume highlights what can be gained from drawing on broad interdisciplinary contexts in pursuing scholarly projects involving cultural memory and associated topics. The collection argues that contemporary evolutionary science, in conjunction with studies interconnecting cognition, affect, and emotion, as well as research on socially mediated memory, provides innovatively interdisciplinary contexts for viewing current work on how cultural and social environments influence gene expression and neural circuitry. Building on this foundation, *Cultural Memory* turns to exploration of the psychological processes and social contexts through which cultural memory is shaped, circulated, revised, and contested. It investigates how various modes of cultural expression—architecture, cuisine, poetry, film, and fiction—reconfigure shared conceptualizing patterns and affectively mediated articulations of identity and value. Each chapter showcases research from a wide range of fields and presents diverse interdisciplinary contexts for future scholarship. As cultural memory is a subject that invites interdisciplinary perspectives and is relevant to studying cultures around the world, of every era, this collection addresses an international readership comprising scholars from the humanities, social sciences, and natural sciences, from advanced undergraduates to senior researchers.

**When Breath Becomes Air** - Paul Kalanithi 2016-01-12

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST •

This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul

Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

**Writing and Rewriting the Holocaust** - Emma Young 1988-10-22

Study of how historical memory and understanding are created in Holocaust diaries, memoirs, fiction, poetry, drama video testimony and memorials. Explores the consequences of narrative understanding for the victims, the survivors, and subsequent generations. Annotation copyrighted by Book News, Inc., Portland, OR

**The Development of Memory in Infancy and Childhood** - Mary L. Courage 2008-09-08

Human memory is not only the repository of our past but the essence of who we are. As such, it is of enduring fascination. We marvel at its resilience in some situations and its fragility in others. The origin of this extraordinary cognitive capacity in infancy and childhood is the focus of

vigorous research and debate as we seek to understand the record of our earliest beginnings. The first edition of this volume, *The Development of Memory in Childhood*, documented the state-of-the-art science of memory development a decade ago. This new edition, *The Development of Memory in Infancy and Childhood*, provides a thorough update and expansion of the previous text and offers reviews of new research on significant themes and ideas that have emerged since then. Topics include basic memory processes in infants and toddlers, the cognitive neuroscience of memory development, the cognitive and social factors that underlie our memory for implicit and explicit events, autobiographical memory and infantile amnesia, working memory, the role of strategies and knowledge in driving memory development, and the impact of stress and emotion on these basic processes. The book also includes applications of basic memory processes to a variety of real world settings from the courtroom to the classroom. Including contributions from many of the best researchers in the field, this classic yet contemporary volume will appeal to senior undergraduate and graduate students of developmental and cognitive psychology as well as to developmental psychologists who want a compendium of current reviews on key topics in memory development.

**Between Memory and History** - Marie Noelle Bourguet 2016-03-31

The recent wave of interest in oral history and return to the active subject as a topic in historical practice raises a number of questions about the status and function of scholarly history in our societies. This article in this volume, originally published in 1990, and which originally appeared in *History and Anthropology*, Volume 2, Part 2, discuss what contributions, meanings and consequences emerge from scholarly history turning to living memory, and what the relationships are between history and memory.

[Places of Public Memory](#) - Greg Dickinson 2010-08-02

A sustained and rigorous consideration of the intersections of memory, place, and rhetoric. Though we live in a time when memory seems to be losing its hold on communities, memory remains central to personal, communal, and national identities. And although popular and public

discourses from speeches to films invite a shared sense of the past, official sites of memory such as memorials, museums, and battlefields embody unique rhetorical principles. *Places of Public Memory: The Rhetoric of Museums and Memorials* is a sustained and rigorous consideration of the intersections of memory, place, and rhetoric. From the mnemonic systems inscribed upon ancient architecture to the roadside accident memorials that line America's highways, memory and place have always been deeply interconnected. This book investigates the intersections of memory and place through nine original essays written by leading memory studies scholars from the fields of rhetoric, media studies, organizational communication, history, performance studies, and English. The essays address, among other subjects, the rhetorical strategies of those vying for competing visions of a 9/11 memorial at New York City's Ground Zero; rhetorics of resistance embedded in the plans for an expansion of the National Civil Rights Museum; representations of nuclear energy—both as power source and weapon—in Cold War and post-Cold War museums; and tours and tourism as acts of performance. By focusing on "official" places of memory, the collection causes readers to reflect on how nations and local communities remember history and on how some voices and views are legitimated and others are minimized or erased.

[Modern Man in Search of a Soul](#) - C.G. Jung 2014-12-18

*Modern Man in Search of a Soul* is the perfect introduction to the theories and concepts of one of the most original and influential religious thinkers of the twentieth century. Lively and insightful, it covers all of his most significant themes, including man's need for a God and the mechanics of dream analysis. One of his most famous books, it perfectly captures the feelings of confusion that many sense today. Generation X might be a recent concept, but Jung spotted its forerunner over half a century ago. For anyone seeking meaning in today's world, *Modern Man in Search of a Soul* is a must.

**Remembering Emmett Till** - Dave Tell 2021-02-15

Take a drive through the Mississippi Delta today and you'll find a landscape dotted with memorials to major figures and events from the civil rights movement. Perhaps the most chilling are those devoted to the murder of Emmett Till, a tragedy of hate and injustice that became a beacon in the fight for racial equality. The ways this event is remembered have been fraught from the beginning, revealing currents of controversy, patronage, and racism lurking just behind the placid facades of historical markers. In *Remembering Emmett Till*, Dave Tell gives us five accounts of the commemoration of this infamous crime. In a development no one could have foreseen, Till's murder—one of the darkest moments in the region's history—has become an economic driver for the Delta. Historical tourism has transformed seemingly innocuous places like bridges, boat landings, gas stations, and riverbeds into sites of racial politics, reminders of the still-unsettled question of how best to remember the victim of this heinous crime. Tell builds an insightful and persuasive case for how these memorials have altered the Delta's physical and cultural landscape, drawing potent connections between the

dawn of the civil rights era and our own moment of renewed fire for racial justice.

**Understanding Racial and Ethnic Differences in Health in Late Life** - National Research Council 2004-09-08

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

**Reflections on Human Nature** - Arthur O. Lovejoy 2020-02-03

He discusses the theory of human nature held by the founders of the American Constitution, giving special attention to James Madison and the "Federalist Papers."
