Mathematics for Machine Learning - Marc Peter Deisenroth 2020-04-23

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Be Afra - Oladipo G. B. Ogunseitan 2010-08  
Be Afra. Be a frater. Be a brother. Be our  
brother's keeper. 'Love the Brotherhood' was the  
message of Beloved Afra, for which he was  
crucified 500,000 years ago on a continent  
named after him - AFRICA. There are more  
things in heaven and earth than are dreamt of in  
our philosophy, science and religion. Life is not a  
happenstance. The Berlin Act 1885, the Biafran  
War 1967-1970, June 12, 1993, Sep 11, 2001;  
the election of Barack Obama as the 44th  
President of the USA or any other event in life is  
not a happenstance. This is demonstrated in Be  
Afra Volumes 1 & 2, using numerological  
analysis and cosmic clock charting. The Cosmic  
Law operates throughout the universe, seen and  
unseen. Be Afra discusses the origin of man, the  
root races with particular emphasis on the  
fourth root race, the progenitor of the black  
race; the law of karma, reincarnation, free will  
and other aspects of the cosmic law. Each root  
race has a divine purpose and from the  
beginning was endowed with divine love,  
wisdom and power to fulfill that purpose. Each  
had the knowledge of the cosmic law. Be Afra  
draws on sacred writings, If, Yrb legends and  
deep analysis of Yrb language to demonstrate  
that the black race had knowledge of the  
Everlasting Gospel, the Teaching that should  
keep mankind free from ignorance or defiance of  
the Law. Ignorance of that Law is no excuse. We  
are who we are and where we are, by series of  
decisions we took, at the Y-junctions of life.  
Beloved Great Divine Director, Manu of the  
seventh (the incoming) root race said: "Perhaps  
we have been a bit timid ourselves, or should I  
say conservative and dignified, in not employing  
more spectacular methods to acquaint mankind  
with the wonderful product which we have to  
offer. After all, blessed ones, we are marketing  
divine freedom to the earth and conveying it to  
individuals every day, yet we are seldom seen or

heard in the marketplace of life. Perhaps the  
'shouting from the housetops' through the  
multitudes of antennas reaching out into the  
ethers shall one day convey a greater measure of  
heaven's law to the earth. We shall see." (Pearls  
of Wisdom Vol. 8 S/No. 21 dated May 23, 1965)
