Black Ethnics - Christina M. Greer 2013-06-27

In an age where racial and ethnic identity intersect, intertwine, and interact in increasingly complex ways, *Black Ethnics: Race, Immigration, and the Pursuit of the American Dream* offers a superb and rigorous analysis of black politics and coalitions in the post-Civil Rights era. Using an original survey of a New York City labor population and multiple national data sources, author Christina M. Greer explores the political significance of ethnicity for new immigrant and native-born blacks. *Black Ethnics* concludes that racial and ethnic identities affect the ways in which black ethnic groups conceptualize their possibilities for advancement and placement within the American polity. The ethnic and racial dual identity for blacks leads to significant distinctions in political behavior, feelings of incorporation, and policy choices in ways not previously theorized. The steady immigration of black populations from Africa and the Caribbean over the past few decades has fundamentally changed the racial, ethnic, and political landscape in the U.S. An important question for social scientists is how these 'new' blacks will behave politically in the US. Should we expect new black immigrants to orient themselves to politics in the same manner as native Blacks? Will the different histories of the new immigrants and native-born blacks lead to different political orientations and behavior, and perhaps to political tensions and conflict among black ethnic groups residing in America? And to what extent will this new population fracture the black coalition inside of the Democratic party? With increases in immigration of black ethnic populations in the U.S., the political, social, and economic integration processes of black immigrants does not completely echo that of native-born American blacks. The emergent complexity of black intra-racial identity and negotiations within the American polity raise new questions about black political incorporation, assimilation, acceptance, and fulfillment of the American Dream. By comparing Afro-Caribbean and African groups to native-born blacks, this book develops a more nuanced and accurate understanding of the 'new black America' in the twenty-first century. Lastly, *Black Ethnics* explores how foreign-born blacks create new ways of defining and understanding black politics and coalitions in the post-Civil Rights era.

Relational Formations of Race - Natalia Molina 2019-02-26

Relational Formations of Race brings African American, Chicana/Latina, Asian American, and Native American studies together in a single volume, enabling readers to consider the racialization and formation of subordinated groups in relation to one another. These essays conceptualize racialization as a dynamic and interactive process; group-based racial constructions are formed not only in relation to whiteness, but also in relation to other devalued and marginalized groups. The chapters offer explicit guides to understanding race as relational across all disciplines, time periods, regions, and social groups. By studying race relationally, and through a shared context of meaning and power,

students will draw connections among subordinated groups and will better comprehend the logic that underpins the forms of inclusion and dispossession such groups face. As the United States shifts toward a minority-majority nation, *Relational Formations of Race* offers crucial tools for understanding today's shifting race dynamics.

The Unfinished Politics of Race - Les Back 2022-12-01

The Unfinished Politics of Race argues that the past few decades have seen important transformations in the politics of race. Contending that existing accounts have focused narrowly on the mainstream political sphere, this study argues that there is a need to explore the role of race more widely. By exploring the mainstream as well as transitional and alternative spheres of political mobilisation the authors stress the need to link the analysis of both local and national processes in order to make sense of the changing contours of racialised politics. The underlying concern of this study is to outline both a theoretical frame for an analysis of racial politics, and detailed empirical accounts of different arenas of political mobilisation. By exploring the unfinished politics of race, this study provides a timely reminder that the position of racial and ethnic minorities in political institutions remains deeply contested.

Dictionary of Race and Ethnic Relations - Pierre L. Van Den Berghe 1996

Interracial Communication - Mark P. Orbe 2022-11-11

As the racial and ethnic landscape of the United States shifts, interracial communication plays an increasingly crucial role. The sociopolitical

climate has impacted identities, relationships, media, and organizations—challenging the possibility of having transformative engagement about race. Power differences affected by race/ethnicity, class, gender, sexuality, ability, age, and geography are sometimes invisible. Competent interracial communication is key to alleviating polarized interactions and addressing the unequal treatment of microcultures. Part I of the book provides essential background, including the history of race, the importance of communication, the development and intersectionality of racial and ethnic identities, and models and theories of interracial communication. Part II applies this information to communication practices in specific, everyday contexts: global racial hierarchies and colorism, friendships/romantic relationships, communication in the workplace, interracial conflict, and race and ethnicity in the media. The concluding chapter outlines pathways to meaningful change and invites readers to become active participants in dialogue to facilitate working through differences. The authors offer comprehensive, readable, and insightful coverage of pressing issues. They focus on communication as vital to removing barriers to understanding. Becoming proactive in eliminating racism on a personal level is a step toward the macrolevel changes required to dismantle systemic racism. The fourth edition is a socially relevant resource for facilitating interracial dialogue to create a positive climate to work together to achieve social justice.

Theories of Race and Ethnic Relations - John Rex 1988-06-24

This book brings together internationally known scholars from a wide range of disciplines and theoretical traditions, all of whom have made significant contributions to the field of race and ethnic relations. As well as identifying important and persistent points of controversy, the collection reveals a complementary and multifaceted approach to theorisation. The theories represented include contributions from the perspective of sociology. These range from the established perspectives of Marx and Weber through to the more recent interventions of rational choice theory, symbolic interactionism and identity structure analysis.

Measuring Racial Discrimination - National Research Council 2004-07-24

Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. *Measuring Racial Discrimination* considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

Race and Ethnic Relations in the Twenty-First Century (Revised First Edition) - Rashawn Ray 2016-08-18

Race and Ethnic Relations in the Twenty-First Century examines the major theoretical and empirical approaches regarding race and ethnicity. Using various sociological theories, social psychological theories, and subcultural approaches, this book gives students a sociohistorical, theoretical, and institutional frame with which to view race and ethnic relations in the twenty-first century.

Race and Ethnic Relations - Brewton Berry 1978

Race, Ethnicity and Social Theory - John Solomos 2022

"Race, Ethnicity and Social Theory provides a critical analysis of the main areas of scholarly research and debate about racial and ethnic relations over the past few decades. The book covers substantive areas of scholarly debate in this fast-changing field, including race and social relations, identities and the construction of the racial other, feminism and race, the relationship between race and nationalism, antisemitism, the evolution of new forms of racism, race and political representation and, more generally, the changing debates about race and ethnicity in our global environment. The book argues that there is a need for more dialogue across national and conceptual boundaries about how to develop the theoretical tools needed to understand both the historical roots of contemporary forms of racialised social and political relations and the contemporary forms through which race is made and re-made. A key argument that runs through the book is that the need to develop conceptual frameworks that can help us to make sense of the changing forms of racial and ethnic relations in contemporary societies. This means developing more dialogue across national research cultures as well as empirical research that seeks to engage with the key issues raised by contemporary theoretical debates. The book will be of interest to both students wanting to develop a deeper understanding of this area of scholarship and to researchers of race, ethnicity and migration working in various national and disciplinary environments"--

Constructivist Theories of Ethnic Politics - Kanchan Chandra
2012-10-25

Taking the possibility of change in ethnic identity into account, this book shows and dismantles the theoretical logics linking ethnic diversity to negative outcomes and processes such as democratic destabilisation, clientelism, riots and state collapse. Even more importantly, it changes the questions we can ask about the relationship between ethnicity, politics and economics.

Understanding 'race' and Ethnicity - Craig, Gary 2012-02-22

Most societies in the developed world are now multicultural, but their welfare systems have largely failed to address the issues and tensions associated with the growth of minority ethnic populations. Taking the United Kingdom as an exemplary case study, *Understanding "Race" and Ethnicity* combines historical and theoretical approaches to the study of the intersection of race and welfare and examines how minorities experience welfare in a range of settings. Informative and inspiring, this book will be essential for anyone striving to build a society that is equal, inclusive, and just for all.

[Handbook of the Sociology of Racial and Ethnic Relations](#) - Pinar Batur

2018-06-11

The study of racial and ethnic relations has become one of the most written about aspects in sociology and sociological research. In both North America and Europe, many "traditional" cultures are feeling threatened by immigrants from Latin America, Africa and Asia. This handbook is a true international collaboration looking at racial and ethnic relations from an academic perspective. It starts from the principle that sociology is at the hub of the human sciences concerned with racial and ethnic relations.

Race Critical Public Scholarship - Karim Murji 2016-10-27

This edited collection addresses the challenges for critically engaged research, teaching and scholarship on race and racism in a climate marked by sweeping changes in universities. Each chapter engages with debates about universities and 'publics', and the public orientation and reach of academic work. How do these factors play out in the work of scholars pursuing racial and social justice? What are the constraints of the marketised university or the bureaucratised political field or the celebrity-hungry arena of media culture? How can we use scholarly research and knowledge to create different and better meanings and outcomes in any of these places? With a focus on engaged and activist scholarship attuned to theory and practice, the chapters consider these issues in France, the UK, USA and Costa Rica. The chapters include discussions of teaching for social justice, collaborating and advocating for migrant and local communities and deploying scholarly knowledge in political work and the media. This book was originally published as a special issue of *Ethnic and Racial Studies*.

Racial Formation in the United States - Michael Omi 2014-06-20

Twenty years since the publication of the Second Edition and more than thirty years since the publication of the original book, *Racial Formation in the United States* now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant, but the overall purpose and vision of this classic remains the same: Omi and Winant provide an account of how concepts of race are created and transformed, how they become the focus of political conflict, and how they come to shape and permeate both identities and institutions. The steady journey of the U.S. toward a majority nonwhite population, the ongoing evisceration of the political legacy of the early post-World War II civil rights movement, the initiation of the 'war on terror' with its attendant Islamophobia, the rise of a mass immigrants rights movement, the formulation of race/class/gender 'intersectionality' theories, and the election and reelection of a black President of the United States are some of the many new racial conditions *Racial Formation* now covers.

The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism - John Stone 2020-10-19

A broad examination of the rise of nationalism, populism, xenophobia, and racism throughout the world *The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism* provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents—offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism. The Companion features original contributions by both established experts and emerging scholars that explore an expansive range of theoretical, historical, and empirical case studies. Organized into five sections, the text first discusses growing trends in the United States, the significance of populism in major societies around the globe, and how global changes are influencing regional variations in race, ethnicity, and nationalism. An investigation of global migration patterns is followed by examination of conflict and violence, from urban riots and boundary disputes to warfare and genocide. The final section focuses on the policy debates resulting from changing patterns and their impact on politics, the economy, and society. Timely and highly relevant, this book: Discusses contemporary issues such as the failure of school systems to provide equal opportunities to minorities, the evolution of the School-to-Prison pipeline, and the Black Lives Matter movement Explores shifts in American race relations, the influence of social media and the internet, and the links between increased globalization and contemporary forms of nationalism, racism, and populism Features essays on national and ethnic identity in China,

Japan, and South Korea, India, Central Asia, Africa, Latin America, and Europe Analyzes policies regarding borders, immigration, refugees, and human rights in different countries and regions Offers perspectives on the radicalization of social movements, the creation of ethnic, linguistic and other boundaries between groups, and the models used to understand intractable conflicts in many global settings The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism is an indispensable resource for scholars, researchers, instructors, and students across the social sciences, including sociology, political science, global affairs, economics, comparative race and ethnic relations, international migration, social change, and sociological theory.

Reconsidering Race - Kazuko Suzuki 2018

In order to more fully understand what we mean by "race", social scientists need to engage genetics, medicine, and health. While the contributors of this volume reject pseudoscience and hierarchical ways of looking at race, they make the claim that it is time to reassess the Western-based, "social construction" paradigm. Arguing that race is not merely socially constructed, the contributors offer a provocative collection of views on the way that social scientists must reconsider the idea of race in the age of genomics.

Theories of Ethnicity - Richard H. Thompson 1989

Theories that explain the persistence and vitality of the "ethnic phenomenon" abound in sociological and anthropological literature. This study is the first, however, to critique the field as a whole. Thompson offers systematic comparisons of current theories, testing both their internal consistency and their adequacy as analytical tools. Thompson devotes a chapter to each of the major theoretical traditions that now dominate the field of ethnicity: sociobiology, primordialism, assimilationism, world-system theory, and neo-Marxism. He describes the basic tenets of each theory and demonstrates that the "facts" they seek to explain are embedded within their theoretical assumptions.

Immigration and Race Relations - Tahir Abbas 2007-08-29

Since the late 1950s John Rex has been at the forefront of British sociology and in particular the sociology of 'race' and ethnicity. His research and books have spawned debate and discussion in the fields of social and political theory, housing studies, education and the

experiences of Muslim minorities. This volume charts the nature, direction and significance of John Rex's work in the fields of urban sociology, ethnic relations and multicultural studies. As well as identifying important and persistent points of controversy the book also reveals much common ground and the potential for a multi-faceted approach to the theorisation of 'race' and ethnicity. "Immigration and Race Relations" includes contributions from eminent thinkers from the perspectives of sociology, social anthropology, education, philosophy, political science and cultural studies.

Racial Theories - Michael Banton 1998-04-13

This thoroughly revised and updated edition of Michael Banton's classic book reviews historical theories of racial and ethnic relations and contemporary struggles to supersede them. It shows how eighteenth- and nineteenth-century concepts of race attempted to explain human difference in terms of race as a permanent type and how these were followed by social scientific conceptions of race as a form of status. In a new concluding chapter, "Race as Social Construct," Michael Banton makes the case for a historically sensitive social scientific understanding of racial and ethnic groupings that operates within a more general theory of collective action and is, therefore, able to replace racial explanations as effectively as they have been replaced in biological science. This book is essential reading for anyone wanting to understand contemporary debates about racial and ethnic conflict. This new edition is thoroughly updated and contains a new chapter on developments in recent years.

Race and Ethnicity in Pandemic Times - Taylor & Francis Group
2021-09-30

This edited collection brings together social scientists working on race and ethnicity to address the question of the impact of the Covid-19 pandemic, with a focus on issues linked to racial and ethnic inequalities. The fourteen chapters that make up this collection were produced during the pandemic in 2020 and are intended to address key facets of the impact of the pandemic in contemporary Europe, the United States and globally. Individual chapters address the pandemic by drawing both on empirical research and conceptual analysis. They also seek to draw important connections between broader dimensions of racial and ethnic inequalities and the health inequalities that have been highlighted by the sharp impact of the pandemic on particular communities and groups. This volume speaks to the need for researchers working on race and ethnicity to respond to the Covid-19 pandemic through both original

research and by reflection on current policy challenges and interventions. The chapters in this book were originally published as a special issue of Ethnic and Racial Studies.
