Universal Dictionary of the English Language - Robert Hunter 1899

**Arts of Subjectivity: A New Animism for the Post-Media Era** - Jacob W. Glazier 2019-12-26

Bringing thinking from the arts and digital humanities into dialogue with one another, this book investigates what it means to be alive in a world that is structured by technology, the media, and an ever expanding sense of a global community. In this unique time in our history, when we are bombarded by signs and symbols and constantly connected into gadgets, apps, and networks, it has become increasingly difficult to navigate what has been dubbed a 'post-truth' world. Critiques taken from post-colonial studies and neoanimism help challenge the paranoia that has become endemic and, indeed, symptomatic to global realities we are now witnessing. This pertains not only to the ecological degradation of the planet but also to the lingering remnants of eurocentrism and racism that have taken the forms of nationalism and fascism. As a guide, an updated version of what Michel Foucault called an arts of existence may help us sail in these treacherous and confusing waters. Diving into post-structuralist French theory, through American feminism, and emerging

out of media studies, this book argues for an ethical and aesthetic form of self-fashioning that runs counter to processes subjection and mediatization. This craft of life, as Plato called it, is a space of disjunction and liberation, between subjectivity and other, where something new and different has the potential to emerge and mould to our likeness.

*The Passionate Intellect* - Alister McGrath 2014-04-07

2011 Christianity Today Book Award winner! Alister McGrath, one of the most prominent theologians and public intellectuals of our day, explains how Christian thinking can and must have a positive role in shaping, nourishing and safeguarding the Christian vision of reality. With this in our grasp, we have the capacity for robust intellectual and cultural engagement, confidently entering the public sphere of ideas where atheism, postmodernism and science come into play. This book explores how the great tradition of Christian theological reflection enriches faith. It deepens our appreciation of the gospel's ability to engage with the complexities of the natural world on the one hand and human experience on the other.

Collected Works of C.G. Jung, Volume 20 - C. G. Jung 2014-03-01

An exceptionally comprehensive index by paragraph numbers. Certain subjects are treated in separate sub-indexes within the General Index. These include alchemy, animals, the Bible, colors, Freud, Jung, and

numbers.

**Alchemy, a Comprehensive Bibliography of the Manly P. Hall Collection of Books and Manuscripts** - Ron Charles Hogart 1986

Extensive biographical and bibliographical descriptions of 164 books and 245 manuscripts from the PRS Library, assembled over a period of sixty-five years and the repository for many rare and scarce esoteric items.

Related material on Rosicrucianism and Jacob Boehme's writings are included, as well as the Bacstrom manuscripts in eighteen volumes with English translations of early alchemical books, a volume of manuscripts from Count Cagliostro's library, Comte de St. Germain's triangular manuscript on vellum, a portion of Ripley's Scroll in full color, the William Law edition of Jacob Boehme with manikin plates attributed to Rubens, and more. Printed in a limited edition of one thousand copies, folio volume, 9" x 12," library binding, 314 pages handsomely illustrated with eight full-color plates and facsimiles of title pages and frontispieces.

**Ficino and Fantasy** - Marieke J.E. van den Doel 2021-12-13

Did the Florentine philosopher Marsilio Ficino (1433-99) influence the art of his time? This book starts with an exploration of Ficino's views on the imagination and discusses whether, how and why these ideas may have been received in Italian Renaissance works of art.

*The Secret History of Hermes Trismegistus* - Florian Ebeling 2007

In this introduction to Hermeticism and its mythical founder, Florian Ebeling provides a concise overview of the Corpus Hermeticum and other writings attributed to Hermes, tracing their influence on Western thought from the ancient world to the present.

**The Encyclopaedic Dictionary** - Robert Hunter 1896

**Chemical News and Journal of Physical Science** - William Crookes 1920

**Zutot 2001** - Shlomo Berger 2002-06-30

The yearbook aims to fill a gap that has become more and more conspicuous among the wealth of scholarly periodicals in the field of Jewish Studies. Whereas existing journals provide space to medium - and large sized articles, they neglect the small but poignant contributions, which may be as important as the extended, detailed study. The yearbook serves as a platform for small but incisive contributions, and provides them with distinct context. The substance of these contributions is derived from larger perspectives and though not always presented in an exhaustive way, will have an impact on contemporary discussions. The yearbook covers Jewish Culture in its broadest sense, i.e. encompassing various academic disciplines - literature, languages and linguistics, philosophy, art, sociology, politics and history - and reflects binary oppositions such as religious and secular, high and low, written and oral, male and female culture.

*Science and Technology in World History, Volume 4* - David Deming 2016-03-30

The history of science is a story of human discovery--intertwined with religion, philosophy, economics and technology. The fourth in a series, this book covers the beginnings of the modern world, when 16th-century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans. Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable. Science emerged in 17th-century Europe as scholars subordinated reason to empiricism. Inspired by the example of physics, men like Robert Boyle began the process of changing alchemy into the exact science of chemistry. During the 18th century, European society became more secular and tolerant. Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies. As the Industrial Revolution fundamentally transformed the world by increasing productivity, people became more

affluent, better educated and urbanized, and the world entered an era of unprecedented prosperity and progress.

*Modernist Alchemy* - Timothy Materer 1995

All of these poets, Timothy Materer says, approached the occult with a modernist sophistication and a self-consciousness that are not entirely credulous nor entirely skeptical.

**Lloyd's Encyclopaedic Dictionary** - 1896

*Goethe The Alchemist* - Ronald D. Gray

*Modernism and Charisma* - A. Horvath 2013-02-19

Looking at the relationship between modernity and the rise of charismatic leaders, Agnes Horvath uses 'threshold' situations to trace the conditions out of which political regimes developed. The focus on rationalism and structure has led to a systematic neglect of uncertain liminal moments, which gave new direction to societies and cultures.

THE ENCYCLOPAEDIC DICTIONARY - 1896

From Alchemy to Chemistry in Picture and Story - Arthur Greenberg 2006-12-15

Praise for *From Alchemy to Chemistry in Picture and Story* "The timeline from alchemy to chemistry contains some of the most mystifying ideas and images that humans have ever devised. Arthur Greenberg shows us this wonderful world in a unique and highly readable book." —Dr. John Emsley, author of *The Elements of Murder: A History of Poison* "Art Greenberg takes us, through text and lovingly selected images, on a 'magical mystery tour' of the chemical universe. No matter what page you open, there is a chemical story worth telling." —Dr. Roald Hoffmann, Nobel Laureate and coauthor of *Chemistry Imagined* "Chemistry has perhaps the most intricate, most fascinating, and certainly most romantic history of all the sciences. Arthur Greenberg's essays-delightful, learned, quirky, highly personal, and richly illustrated with contemporary

drawings (many of great rarity and beauty)-provide a kaleidoscope of intellectual landscapes, bringing the experiments, the ideas, and the human figures of chemistry's past intensely alive." —Dr. Oliver Sacks, author of *Awakenings From Alchemy to Chemistry in Picture and Story* takes you on an illustrated tour of chemistry's fascinating history, from its early focus on the spiritual relationship between man and nature to some of today's most cutting-edge applications. Drawing from rare publications and artwork that span over five centuries, the book contains nearly 200 essays and over 350 illustrations-including 24 in full color-that tell the engaging story of the development of this fundamental science and its connection with human history. Join Arthur Greenberg as he combines the "best of the best" from his previous works (as well as several new essays) to paint a colorful picture of chemistry's remarkable origins!

**The Story of N** - Hugh S. Gorman 2013-01-24

In *The Story of N*, Hugh S. Gorman analyzes the notion of sustainability from a fresh perspective—the integration of human activities with the biogeochemical cycling of nitrogen—and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon. It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and, later, began addressing the resulting concerns by establishing limits of their own. The book is organized into three parts. Part I, "The Knowledge of Nature," explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root. Part II, "Learning to Bypass an Ecological Limit," examines the role of science and market capitalism in accelerating the pace of innovation, eventually allowing humans to bypass the activity of nitrogen-fixing bacteria. Part III, "Learning to Establish Human-Defined Limits," covers the twentieth-century response to the nitrogen-related concerns that emerged as more nitrogenous compounds flowed into the environment. A concluding chapter, "The Challenge of Sustainability," places the entire story in the context of constructing an ecological economy in which innovations that

contribute to sustainable practices are rewarded.

**The American Dictionary and Cyclopaedia** - Robert Hunter 1900

**Blake: The Complete Poems** - W.H. Stevenson 2014-05-12

William Blake (1757 - 1827) is one of the great figures in literature, by turns poet, artist and visionary. Profoundly libertarian in outlook, Blake's engagement with the issues of his day is well known and this - along with his own idiosyncratic concerns - flows through his poetry and art. Like Milton before him, the prodigality of his allusions and references is little short of astonishing. Consequently, his longer visionary poems can challenge the modern reader, who will find in this avowedly open edition all they might need to interpret the poetry. W. H. Stevenson's Blake is a masterpiece of scrupulous scholarship. It is, as the editor makes clear in his introduction, 'designed to be widely, and fluently, read' and this Third Edition incorporates many changes to further that aim. Many of the headnotes have been rewritten and the footnotes updated. The full texts of the early prose tracts, *All Religions are One* and *There is no Natural Religion*, are included for the first time. In many instances, Blake's capitalisation has been restored, better to convey the expressive individuality of his writing. In addition, a full colour plate section contains a representation of Blake's most significant paintings and designs. As the 250th anniversary of his birth approaches, Blake has perhaps more readers than ever before; *Blake: The Complete Poems* will stand those readers, new and old, in good stead for many years to come.

**The Alchemical Mercurius** - Mathew Mather 2014-03-05

The figure of the alchemical Mercurius features ubiquitously and radically in Jung's later works, but despite this, there has been little research concerning Mercurius in Jungian studies to date. In this book, Mathew Mather explores the figure of the alchemical Mercurius and contextualises and clarifies its significance in Jung's life and works. Placing the alchemical Mercurius as a central concern reveals a Jungian interpretation in which the grail legend, alchemy and precessional

astrology, as three thematic threads, converge. In such a treatment, Jung's belief in the dawning of a new platonic month emerges as a central consideration and an esoteric perspective on Jung's life and works is brought more fully to light, constructing a life-myth interpretation. The book is comprised of three parts: *Aurea Catena*: locating the figure of the alchemical Mercurius within the Western esoteric tradition *Daimonic Encounter*: the relevance of this figure in Jung's personal life *Magnum Opus*: Jung's portrayal of this figure in key texts such as *Synchronicity*, *Aion*, *Mysterium Coniunctionis*; and *Emma Jung and von Franz's The Grail Legend*. *The Alchemical Mercurius* is a unique contribution to analytical psychology, substantially revealing 'esoteric Jung' and providing valuable perspectives on the theme of his myth for our times. The book will appeal to researchers and academics in the field of analytical psychology as well as postgraduate students.

**From 'Poimandres' to Jacob Böhme** - Roel B. van den Broek

2022-06-20

14 studies dealing with ancient, medieval and early modern forms of Gnosis, their myths, rites, ideas and expectations, with strong emphasis on Hermetic traditions. Contributions by R. van den Broek, C. Gilly, P. Kingsley, J.-P. Mahé, and G. Quispel.

*Goethe the Alchemist* - Ronald Douglas Gray 2010-06-17

This 1952 study analyses Goethe's writings in the light of his youthful readings in alchemy.

**Concise Oxford English Dictionary** - Angus Stevenson 2011-08-18

Offers definitions for English words and phrases, along with observations about the evolution of the dictionary since its first edition and tables that contain information for such topics as countries and chemical elements.

**The Foundations of Newton's Alchemy** - B. J. T. Dobbs 1983-04-29

This book sets the foundations of Newton's alchemy in their historical context in Restoration England. It is shown that alchemical modes of thought were quite strong in many of those who provided the dynamism for the scientific revolution of the seventeenth century and that these modes of thought had important relationships with general movements for reform in the same period.

**The Alchemy Reader** - Stanton J. Linden 2003-08-28

Table of contents

*The Sciences of Homosexuality in Early Modern Europe* - Kenneth Borris 2013-01-11

The Sciences of Homosexuality in Early Modern Europe investigates early modern scientific accounts of same-sex desires and the shapes they assumed in everyday life. It explores the significance of those representations and interpretations from around 1450 to 1750, long before the term homosexuality was coined and accrued its current range of cultural meanings. This collection establishes that efforts to produce scientific explanations for same-sex desires and sexual behaviours are not a modern invention, but have long been characteristic of European thought. The sciences of antiquity had posited various types of same-sexual affinities rooted in singular natures. These concepts were renewed, elaborated, and reassessed from the late medieval scientific revival to the early Enlightenment. The deviance of such persons seemed outwardly inscribed upon their bodies, documented in treatises and case studies. It was attributed to diverse inborn causes such as distinctive anatomies or physiologies, and embryological, astrological, or temperamental factors. This original book freshly illuminates many of the questions that are current today about the nature of homosexual activity and reveals how the early modern period and its scientific interpretations of same-sex relationships are fundamental to understanding the conceptual development of contemporary sexuality.

*The Alchemist* -

The Alchemist is a comedy by English playwright Ben Jonson. First performed in 1610 by the King's Men, it is generally considered Jonson's best and most characteristic comedy; Samuel Taylor Coleridge claimed that it had one of the three most perfect plots in literature. The play's clever fulfillment of the classical unities and vivid depiction of human folly have made it one of the few Renaissance plays (except the works of Shakespeare) with a continuing life on stage.

**Alchemy and Chemistry in the 16th and 17th Centuries** - Piyo Rattansi 1994-08-31

The present volume owes its origin to a Colloquium on "Alchemy and Chemistry in the Sixteenth and Seventeenth Centuries", held at the Warburg Institute on 26th and 27th July 1989. The Colloquium focused on a number of selected themes during a closely defined chronological interval: on the relation of alchemy and chemistry to medicine, philosophy, religion, and to the corpuscular philosophy, in the sixteenth and seventeenth centuries. The relations between Medicina and alchemy in the Lullian treatises were examined in the opening paper by Michela Pereira, based on researches on unpublished manuscript sources in the period between the 14th and 17th centuries. It is several decades since the researches of R.F. Multhauf gave a prominent role to Johannes de Rupescissa in linking medicine and alchemy through the concept of a quinta essentia. Michela Pereira explores the significance of the Lullian tradition in this development and draws attention to the fact that the early Paracelsians had themselves recognized a family resemblance between the works of Paracelsus and Roger Bacon's scientia experimentalis and, indeed, a continuity with the Lullian tradition.

**Emerson's Sublime Science** - E. Wilson 1999-02-02

Emerson's Sublime Science explores relationships among Emerson's poetics, theory of the sublime, and engagement with electromagnetism. The book illustrates how Davy's chemistry and Faraday's physics revealed to Emerson a sublime universe in which matter is boundless electrical force. It argues that Emerson translated this discovery into a sublime writing style crafted to galvanize readers with the insight that matter is energy. In illuminating Emerson's project, this study also uncovers connections among British Romanticism, American Romanticism, and nineteenth-century science.

**Alchemy in the Rain Forest** - Jerry K. Jacka 2015-10-19

In Alchemy in the Rain Forest Jerry K. Jacka explores how the indigenous population of Papua New Guinea's highlands struggle to create meaningful lives in the midst of extreme social conflict and environmental degradation. Drawing on theories of political ecology, place, and ontology and using ethnographic, environmental, and historical data, Jacka presents a multilayered examination of the impacts

large-scale commercial gold mining in the region has had on ecology and social relations. Despite the deadly interclan violence and widespread pollution brought on by mining, the uneven distribution of its financial benefits has led many Porgerans to call for further development. This desire for increased mining, Jacka points out, counters popular portrayals of indigenous people as innate conservationists who defend the environment from international neoliberal development. Jacka's examination of the ways Porgerans search for common ground between capitalist and indigenous ways of knowing and being points to the complexity and interconnectedness of land, indigenous knowledge, and the global economy in Porgera and beyond.

*The International Encyclopaedic Dictionary ...* - 1901

**Collected Works of C.G. Jung: Alchemical Studies (Volume 13) -**

C.G. Jung 2014-12-18

The psychological and religious implications of alchemy were Jung's major preoccupation during the last thirty years of his life. The essays composing the present volume complete the publication of his alchemical researches, to which three entire volumes have been devoted ^DDL the monumental *Mysterium Coniunctionis*, *Psychology and Alchemy*, and *Aion* ^DDL besides shorter papers in other volumes. This collection of shorter *Alchemical Studies* has special value as an introduction to Jung's work on alchemy. The first study, on Chinese alchemy, marked the beginning of his interest in the subject, and was originally published in a volume written jointly with Richard Wilhelm. The other four are now published for the first time completely in English.
