*Language and Intercultural Communication in the New Era* - Farzad Sharifian 2013

Studies of intercultural communication in applied linguistics initially focused on miscommunication, mainly between native and non-native speakers of English. The advent of the twenty-first century has witnessed, however, a revolution in the contexts and contents of intercultural communication; technological advances such as chat rooms, emails, personal weblogs, Facebook, Twitter, mobile text messaging on the one hand, and the accelerated pace of people's international mobility on the other have given a new meaning to the term 'intercultural communication'. Given the remarkable growth in the prevalence of intercultural communication among people from many cultural backgrounds, and across many contexts and channels, conceptual divides such as 'native/non-native' are now almost irrelevant. This has caused the power attached to English and native speaker-like English to lose much of its automatic domination. Such developments have provided new opportunities, as well as challenges, for the study of intercultural communication and its increasingly complex nature. This book showcases recent studies in the field in a multitude of contexts to enable a collective effort towards advancements in the area.

**The Routledge Handbook of Ecolinguistics** - Alwin F. Fill 2017-07-31

It continues with an overview of the role of language and discourse in describing, concealing, and helping to solve environmental problems. With discussions on new orientations and topics for further exploration in the field, chapters in the last section show ecolinguistics as a pacesetter into a new scientific age. This Handbook is an excellent resource for students and researchers interested in language and the environment, language contact, and beyond.

*The Handbook of Communication in Cross-cultural Perspective* - Donal Carbaugh 2016-08-19

This handbook brings together 26 ethnographic research reports from around the world about communication. The studies explore 13 languages from 17 countries across 6 continents. Together, the studies examine, through cultural analyses, communication practices in cross-cultural perspective. In doing so, and as a global community of scholars, the studies explore the diversity in ways communication is understood around the world, examine specific cultural traditions in the study of communication, and thus inform readers about the range of ways communication is understood around the world. Some of the communication practices explored include complaining, hate speech, irreverence, respect, and uses of the mobile phone. The focus of the handbook, however, is dual in that it brings into view both communication as an academic discipline and its use to unveil culturally situated practices. By attending to communication in these ways, as a discipline and a specific practice, the handbook is focused on, and will be an authoritative resource for understanding communication in cross-cultural perspective. Designed at the nexus of various intellectual traditions such as the ethnography of communication, linguistic ethnography, and cultural approaches to discourse, the handbook employs, then, a general approach which, when used, understands communication in its particular cultural scenes and communities.
