Let Us Not Forget - Vurlee A. Toomey 2002-07

Over 70 authors and veterans share the sacrifices so many of America's veterans have made, in peacetime and in war, throughout the 20th century. You'll read about Duty, Honor, Courage - from the testing of a submarine, to the loss of the Space Shuttle Challenger, to the everyday sacrifice of men and women in uniform, whether serving during peace or war. You'll walk bloodied beaches, soar over enemy turf, pray, crawl in and out of caves, tend the wounded, shoot and be shot at, feel your heart race with fright as flak comes at you from every direction...walk the deck...hit the deck...feel the heat as fire dances across the deck, into the cockpit and into the foxhole you occupy. Your heart will constrict as the man in front of you takes the bullet meant for you. You'll know the painful bite of shrapnel, the gnawing ache hunger brings and red-hot anger as a comrade falls. But most of all, you'll experience total, unabridged fear as you watch the enemy advance through the eyes of the author, and a swelling of pride as you meet America's veterans.

International Education Hubs - Jane Knight 2013-09-11

Education hubs are the newest development in the international higher education landscape. Countries, zones and cities are trying to position themselves as reputed centres for higher education and research. But given higher education's current preoccupation with competitiveness, branding, and economic benefits are education hubs merely a fad, a branding exercise, or are they an important innovation worthy of serious investment and attention? This book tries to answer the question through a systematic and comparative analysis of the rationales, actors, policies, plans and accomplishments for six serious country level education hubs - United Arab Emirates, Qatar, Malaysia, Hong Kong, Singapore and Botswana . The in-depth case studies shows that "one size does not fit all". A variety of factors drive countries to prepare and position themselves as an education hub. They include income generation, soft power, modernization of domestic tertiary education sector, economic competitiveness, need for trained work force, and most importantly a desire to move towards a knowledge or service based economy. In response to these different motivations, three different types of education hubs are being developed: the student hub, talent hub, and knowledge/innovation hub. Scholars, policy makers, professionals, students and senior decision makers from education, economics, geography, public policy, trade, migration will find that this book challenges some assumptions about crossborder education and provides new insights and information.

Center Will Hold - Michael Pemberton 2003-12-01

In *The Center Will Hold*, Pemberton and Kinkead have compiled a major volume of essays on the signal issues of scholarship that have established the writing center field and that the field must successfully

address in the coming decade. The new century opens with new institutional, demographic, and financial challenges, and writing centers, in order to hold and extend their contribution to research, teaching, and service, must continuously engage those challenges. Appropriately, the editors offer the work of Muriel Harris as a key pivot point in the emergence of writing centers as sites of pedagogy and research. The volume develops themes that Harris first brought to the field, and contributors here offer explicit recognition of the role that Harris has played in the development of writing center theory and practice. But they also use her work as a springboard from which to provide reflective, descriptive, and predictive looks at the field.

Contemporary Issues in International Law - B.C. Nirmal 2018-02-13

This book explores the changing nature of international law and its ability to respond to the contemporary issues related to international environment, trade and information technology. The evolution of international law has reached a stage where we are witnessing diminishing power of the state and its capacity to deal with the economic matters challenging the existing notions of territory and sovereignty. Recent trends in international law and international relations show that states no longer have exclusive control over the decision-making process at the global level. Keeping this in mind, the book brings together the perspectives of various international and national scholars. The book considers diverse issues such as, sustainable development, climate change, global warming, Rio+20, technology transfer, agro-biodiversity and genetic resource, authority for protection of environment, human right to water, globalization, human rights, sui generis options in IP laws, impact of liberalization on higher education, regulation of international trade, intellectual property rights, collective administration of copyright, broadcast reproduction rights, implementation of copyright law, communication rights under copyright law, arbitration for IP disputes, doctrine of exhaustion of rights, trans-border reputation of trademark, information as an asset, cyber obscenity and pornography, e-governance, taxation of e-commerce, computer crime, information technology, domain names, research excellence in legal education, ideological perspective on legal education, challenges for law teachers, and clinical legal education. The topics, though diverse, are closely interrelated, with the common concern throughout being that the global environment, international trade, information technology and legal education need appropriate national normative and institutional responses as well as the global cooperation of members of the international community. Presenting reflections of a number of Asian, African and European scholars on these varied facets, the book is of great value to scholars, practitioners, teachers and students associated with contemporary international law.

Awaken to the Brand New You - Luis Soto Jr 2014-10-28

"This life is a gift from God. He gave us life everlasting to fulfill our calling. No one has the authority to tell us on how to live our life. Live your life from your heart and pay attention to your intuition. Don't be afraid to make mistakes, fall on your face, or look foolish in front of people. We are here to be the best we can be

with what we have. Don't give up on yourself so soon. As we mature into who we are becoming... The change will be everlasting. Give yourself permission to finish your goals. The main thing is to never give up on yourself. Once we do that, life gives up on us. I hope that my story will help you see your life differently. This path was not easy for me to walk and share my deepest secret with you. I am thankful that my journey was not in vain, as I now pass the baton to you so you can run and win your race. With my deepest gratitude and love for humanity I wish you abundant blessings. May you start your journey today to awaken to the brand new you Namaste." --Luis Soto Jr., Transformational Life Coach

The Globalisation of Higher Education - Timothy Hall 2018-06-26

This book argues that the neoliberal globalisation of higher education faces a need for recalibration. In light of increased concerns from universities in cultivating globalisation, this volume brings together a multi-ethnic and multilingual team of researchers who argue that the continued development of internationalized education now requires new research and practices. As university leaders seek to build the best programs to help students to go abroad, they can face a number of challenges - risk management, negotiating with diverse partners, designing rich experience-based learning and the hopes, fears and limitations of the students themselves. Consequently, the authors argue that changes are particularly important given the current US-centric and UK-centric structural readjustments to globalization policies across all fields of higher education and knowledge production. This multi-perspectival edited collection will appeal to students and scholars of global education, globalization and international education.
