Pantone: The Twentieth Century in Color - Leatrice Eiseman 2011-10-19
Pantone, the worldwide color authority, invites you on a rich visual tour of 100 transformative years. From the Pale Gold (15-0927 TPX) and Almost Mauve (12-2103 TPX) of the 1900 Universal Exposition in Paris to the Rust (18-1248 TPX) and Midnight Navy (19-4110 TPX) of the countdown to the Millennium, the 20th century brimmed with color. Longtime Pantone collaborators and color gurus Leatrice Eiseman and Keith Recker identify more than 200 touchstone works of art, products, decor, and fashion, and carefully match them with 80 different official PANTONE color palettes to reveal the trends, radical shifts, and resurgences of various hues. This vibrant volume takes the social temperature of our recent history with the panache that is uniquely Pantone.
Pantone: Box of Colour: 6 Mini Board Books! - Pantone 2012-11-01
This beautiful box is brimming with gorgeous

PANTONE colors and surprises. With a volume for each color of the rainbow--red, orange, yellow, green, blue, and purple--these six chunky board books feature simple peek-through cutouts that transform as you turn the pages. Simple text prompts parents and children to label objects and observe lighter and darker shades of the same color family, promoting a new way of noticing the colorful--and surprising--world around us. Praise for Pantone: Box of Color "Pleasingly tactile variations of six colors..."--The Wall Street Journal "The books, which are smart and well-designed, showcase subtle shades of six colors (red, orange, yellow, green, blue, and purple), while die-cuts do double duty as they introduce basic objects."--Publishers Weekly

On Vision and Colors - Arthur Schopenhauer
2010-02-15

During the first two decades of the nineteenth century, two of the most significant theoretical works on color since Leonardo da Vinci's *Trattato della Pittura* were written and published in Germany: Arthur Schopenhauer's *On Vision and Colors* and Philipp Otto Runge's *Color Sphere*. For Schopenhauer, vision is wholly subjective in nature and characterized by processes that cross over into the territory of philosophy. Runge's *Color Sphere* and essay "The Duality of Color" contained one of the first attempts to depict a comprehensive and harmonious color system in three dimensions. Runge intended his color sphere to be understood not as a product of art, but rather as

a "mathematical figure of various philosophical reflections." By bringing these two visionary color theories together within a broad theoretical context philosophy, art, architecture, and design this volume uncovers their enduring influence on our own perception of color and the visual world around us.

Colorstrology - Michele Bernhardt 2005
Four out of 10 North Americans read their horoscope daily, 10 out of 10 have a birthday, and almost all of them see the world in living colour. Colorstrology, already with a highly successful website at colorstrology.com, infuses elements of astrology and numerology with the spirituality of colour to create a colour profile for every day of the year. Cleverly packaged with 32 pages of perforated colour chips, this new genre of metaphysical fun will bridge the consumer gap between the house-proud urbanite and the barefoot spiritualist. Colorstrology, the company, is rolling out an entire line of branded products, from cosmetics and jewellery to cards and

flowers, but this is the only comprehensive book available by the author who New York magazine calls a "must-see phenomenon."

Guidelines for the management of symptomatic sexually transmitted infections - World Health Organization 2021-07-15

The WHO global health sector strategy on sexually transmitted infections, 2016-2021, endorsed by the World Health Assembly in 2016, aims to eliminate STIs as a public health threat

by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent

urethral discharge syndrome; vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome. These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline - primary, secondary and tertiary health care.

The Complete Color Harmony, Pantone Edition -
Leatrice Eiseman 2017-09-01

The Complete Color Harmony: Pantone Edition is the latest in Rockport Publishers' best-selling color series. Completely revised from start to finish this new edition, is written by Leatrice Eiseman, executive director of the Pantone Color Institute. And the color "moods" that she writes about in each chapter are based and matched with Pantone colors. The book expands on previous editions for the most comprehensive color reference to date. This edition includes information on creating special effects, as well

as an entirely new section devoted to the psychology of color. Eiseman helps readers determine their best color choices and suggests why some colors may inspire their creativity while others don't. The book includes new color palette sections along with expanded and updated color trends.

Printing Colors in Graphic Design - SendPoints
2016

Nothing gives life to a design like color. It has the ability to instantly transform the look and feel of a graphic by appealing to our preferences and emotions. In printing, there are two main color systems that are used in producing color in print, CMYK and PMS. CMYK, or four color process, is a subtractive color model which works by masking colors on a light background. PMS, or Pantone Matching System, is used for producing spot colors accurately. Together they are able to achieve almost any desired effect through complementary systems. This book demystifies their use while providing a breathtaking display of color in print by some of the world's most talented designers.

Traces of Vermeer - Jane Jelley 2017-07-14

Johannes Vermeer's luminous paintings are loved and admired around the world, yet we do not understand how they were made. We see

sunlit spaces; the glimmer of satin, silver, and linen; we see the softness of a hand on a lute string or letter. We recognise the distilled impression of a moment of time; and we feel it to be real. We might hope for some answers from the experts, but they are confounded too. Even with the modern technology available, they do not know why there is an absence of any preliminary drawing; why there are shifts in focus; and why his pictures are unusually blurred. Some wonder if he might possibly have used a camera obscura to capture what he saw before him. The few traces Vermeer has left behind tell us little: there are no letters or diaries; and no reports of him at work. Jane Jelley has taken a new path in this detective story. A painter herself, she has worked with the materials of his time: the cochineal insect and lapis lazuli; the sheep bones, soot, earth and rust. She shows us how painters made their pictures layer by layer; she investigates old secrets; and hears travellers' tales. She explores

how Vermeer could have used a lens in the creation of his masterpieces. The clues were there all along. After all this time, now we can unlock the studio door, and catch a glimpse of Vermeer inside, painting light.

Evocative Objects - Sherry Turkle 2011-09-30
Autobiographical essays, framed by two interpretive essays by the editor, describe the power of an object to evoke emotion and provoke thought: reflections on a cello, a laptop computer, a 1964 Ford Falcon, an apple, a mummy in a museum, and other "things-to-think-with." For Sherry Turkle, "We think with the objects we love; we love the objects we think with." In *Evocative Objects*, Turkle collects writings by scientists, humanists, artists, and

designers that trace the power of everyday things. These essays reveal objects as emotional and intellectual companions that anchor memory, sustain relationships, and provoke new ideas. These days, scholars show new interest in the importance of the concrete. This volume's special contribution is its focus on everyday riches: the simplest of objects—an apple, a datebook, a laptop computer—are shown to bring philosophy down to earth. The poet contends, "No ideas but in things." The notion of evocative objects goes further: objects carry both ideas and passions. In our relations to things, thought and feeling are inseparable. Whether it's a student's beloved 1964 Ford Falcon (left behind for a station wagon and motherhood), or a cello that inspires a meditation on fatherhood, the intimate objects in this collection are used to reflect on larger themes—the role of objects in design and play, discipline and desire, history and exchange, mourning and memory, transition and passage,

meditation and new vision. In the interest of enriching these connections, Turkle pairs each autobiographical essay with a text from philosophy, history, literature, or theory, creating juxtapositions at once playful and profound. So we have Howard Gardner's keyboards and Lev Vygotsky's hobbyhorses; William Mitchell's Melbourne train and Roland Barthes' pleasures of text; Joseph Cevetello's glucometer and Donna Haraway's cyborgs. Each essay is framed by images that are themselves evocative. Essays by Turkle begin and end the collection, inviting us to look more closely at the everyday objects of our lives, the familiar objects that drive our routines, hold our affections, and open out our world in unexpected ways.

Metallics Guide - 2019-03-04

Roy Lichtenstein - James Rondeau 2012
The most iconic works of Roy Lichtenstein

(1923-1997) are widely known, reproduced, copied, and even parodied. However, the true diversity and complexity of his oeuvre is little understood, and the full scope of his career is largely absent from the existing literature. Presenting over 130 paintings and sculptures, as well as over thirty seldom or never-before-seen drawings and collages, this book examines all periods in Lichtenstein's career, going well beyond his brushstrokes and the classic Pop romance and war cartoon paintings that made him famous. This title features exciting new scholarship by an international team of distinguished curators, critics, and art historians. Essays by Yve-Alain Bois, Chrissie Iles, and Stephen Little, among others, give special consideration to Lichtenstein's historical influences, from Picasso and Cubism through Surrealism, Futurism, and British Pop.
